VALVE

Professional tank valves specifically designed for divers — heavy forged brass — high pressure gauge outlet — low contour — easy action wheel — blowout proof “O” ring seal.

MASK

The finest rubber and Neoprene compounds. Tempered glass safety lens — stainless steel “Lens-Lock” band — feather edge seal.

SNORKEL

A combination of rigid and flexible pipe snorkels with comfortable contoured mouthpieces.

REGULATOR

Scubair Regulators. Professional engineering, simplicity, maximum air flow, provide minimum inhalation effort at any depth. Heavy chrome plated brass construction.

TANK

All Healthways tanks have durable galvanized finish. They are also available with the exclusive black Epoxy coating over galvanizing.

SUBMERSIBLE GAUGE

An accurate, leak proof, pressure proof gauge that is unaffected by extremely rough usage.

SUIT

Custom contoured fit with the seams permanently bonded by Healthways exclusive process.

WEIGHT BELT

Heavy duty two inch nylon webbing — stainless steel quick release buckle — non-slip contour weights.

AUTOMATIC DECOMPRESSION METER

A simple, infallible guide to diving safety. Automatically calculates required decompression time.

WATCH

An invaluable aid for planning and executing a dive safely. Contains elapsed diving time Bezel.

KNIFE

All purpose utility knife can be used to cut, hack, saw or even pry Abalones.

FIXE PALME

Insures maximum fin security.

ROUNDINE FINS

The most popular fin in the world. Maximum propulsion and comfort with minimum exertion.

HEALTHWAYS

RESEARCH AND DEVELOPMENT

HEALTHWAYS

VICTOR DeSANCTIS, after many years of scientific research, produced the absolute diving safety device, THE AUTOMATIC DE-COMPRESSION METER. Through this invention, Mr. DeSanctis will be honored as one of the greatest benefactors of diving safety. In collaboration with Healthways, he continues to research the science of decompression.

PUCCIARINI'S fame in the underwater world was first established as a member of the Italian Underwater Demolition Team, during the Second World War, when he helped create the one-man and two-man submarine. Mr. Pucciarini has developed two- and four-man submarines for the United States and Allied Navies. In collaboration with the Healthways Research and Development Division, he has developed the SEA SHARK and NAUTILUS.

PROFESSOR LUIGI FERRARI, an associate of Egidio Cressi and Director of the Research Department of Cressi-sub in Genoa, Italy, is recognized the world over as the greatest authority on underwater propulsion. His Rondine fin design and principles have set the pace in fin development. The Super Rondine Fins are the latest creation by Professor Ferrari, in collaboration with the Healthways Research and Development Division.

GUSTAV DALLA VALLE, Director of Healthways Diving Research and Development Division, is a world-famous diver and underwater pioneer. Because of a compelling feeling of responsibility toward every fellow diver, he personally tests, under the most trying conditions, every item manufactured under his control. A wealth of underwater experiences in all the waters of the world and his ingenuity have been the foundation for his success in bringing to divers everywhere the safest, most advanced and most practical equipment in existence.

His life has always been devoted to the promotion of the diving sport. He is greatly responsible for introducing diving on a popular basis to the United States by presenting to the American market the first full-foot fin, the Cressi

Rondine, which today is the most popular fin in the world.

Dalla Valle's international reputation and his renown as one of the outstanding pioneers and developers in the underwater field have earned the respect and the cooperation of the world's most outstanding underwater scientists.

Healthways Research and Development Division, under Dalla Valle's guidance and with the cooperation of the world's leading underwater scientists, assures that every Healthways product is the most advanced and the finest available.

RICHARD E. ANDERSON graduated from the Sparling School of Deep Sea Diving in 1953. Because of his mechanical background, he immediately became interested in the design and development of underwater equipment. He was one of the first diving mechanical engineers in the United States who was engaged in the study and development of SCUBA apparatus.

In 1954 Richard Anderson joined Healthways Research and Development Division and has since added his experience and ability to produce the world's finest line of regulators. His development of the Scubair regulators has been an important contribution to the safety and advancement of the underwater sport.

JIM CHRISTIANSEN, the most famous and respected American diver, and one of the foremost advocates of diving safety education, is the developer of Healthways SCUBA-VEST. All experts agree that the SCUBA-VEST is the greatest contribution to diving safety made in many years. He was USA National Spearfishing Champion in 1956 and 1957, and Athlete of the Year in 1957. He has been Coach of the American National Spearfishing Team since 1957, and is now a full-fledged member of Healthways Research and Development Division.

DAVID R. DENIS, B.S.M.E., is in charge of all engineering activities and of manufacturing and production control at Healthways. A mechanical engineer and graduate of the University of Florida, he was formerly a member of the Research Division of Standard Oil of New Jersey. His scientific contribution in the development of new products has made Healthways products the best-engineered in the world.

ELLIS R. CROSS, Master Diver, is a former Naval Officer and former owner of the world-famous Sparling School of Deep Sea Diving. Cross was on the staff of the Commander of the Ship Salvage Unit at Bikini during the atom bomb tests. He was a delegate to the Conference for National Cooperation in Aquatics at Yale University, on Underwater Safety.

Cross is the author of Healthways "UNDERWATER SAFETY," and several technical diving books specializing in the psychology of diving, diving diseases, diving physics and diving equipment. His contributions of equipment and diving safety through the Healthways Research and Development organization are of great consequence.

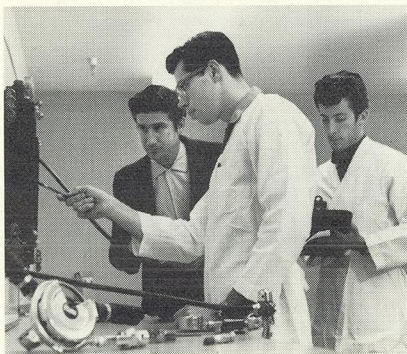

EGIDIO CRESSI, Director General of Cressi-sub in Genoa, Italy, and a pioneer of the diving sport, is one of the first manufacturers of diving equipment. He is world-famous for his continued contribution to the underwater sport by developing new and safer products. Cressi products are known as the most advanced professional diving equipment available.

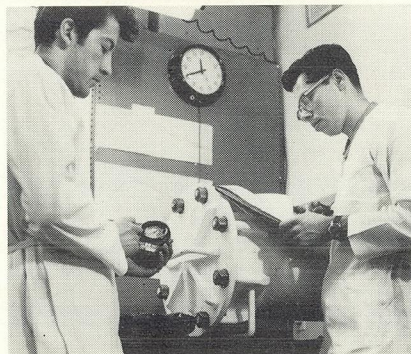

Vice President and General Sales Manager Randolph K. Stone, inspects production model Scubair Regulator with Gustav Dalla Valle, director of Research and Development; Richard E. Anderson, Chief SCUBA Engineer; and Professor Luigi Ferrari, SCUBA Designer and Scientific Consultant.

RESEARCH AND DEVELOPMENT

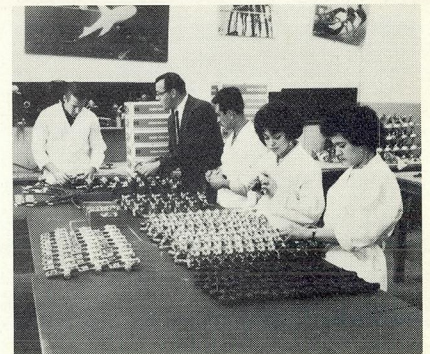

HEALTHWAYS

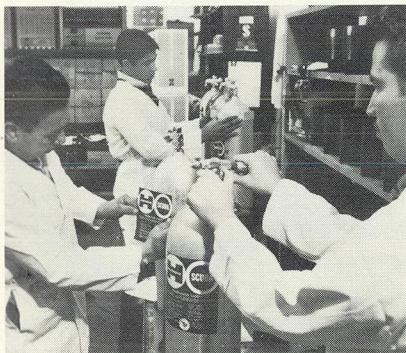

Chief SCUBA Engineer Richard E. Anderson checks results of regulator flow test with his laboratory assistants.

Lab technicians Roberts and Castillo run exhaustive tests on Automatic Decompression Meters in air chamber that can simulate depths to 1000 feet.

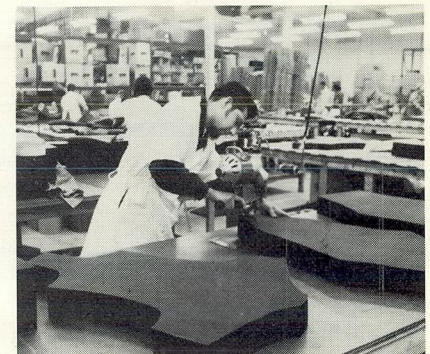

Highly trained assembly personnel work under the careful inspection of Chief Engineer David R. Denis.

Scubapak Harnesses and identifying labels are put on Healthways SCUBA Tanks after thorough testing and filling.

Modern inspection and packaging techniques speed production of world famous Cressi Rondine Fins.

Healthways modern suit production ensures consistent high quality comfort and fit.

DIVE MASKS

HEALTHWAYS

Healthways dive masks are the result of the combined experience and knowledge of the world's foremost American and European divers. They are designed and manufactured with consideration of the most important factors — quality, workmanship and utility.

STABILIZATOR MASK

No. 1260
Professional Black
\$5.95

The world's most popular mask incorporates finger wells for pressure compensation of the ears. The Stabilizator Mask features stainless steel "Lens-Lock" band—tempered glass lens—split head strap for secure fit—comfortable feather edge seal.

STABILIZATOR "CLEAR-EASE"

No. 1261
Professional Black
\$6.95

The Stabilizator "Clear-Ease" Mask incorporates all the outstanding professional features of the Stabilizator, plus Healthways simple and efficient non-return valve which allows the diver to clear water from the mask in the normal swimming position. The Stabilizator "Clear-Ease" features stainless steel "Lens-Lock" band—tempered glass lens—split head strap for secure fit—comfortable feather edge seal.

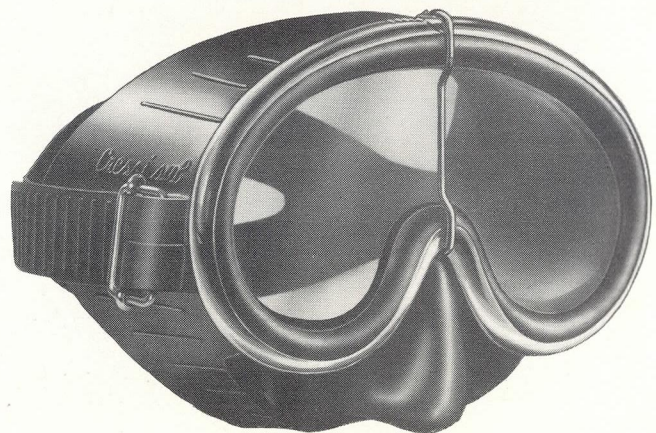

PINOCCHIO PROFESSIONAL

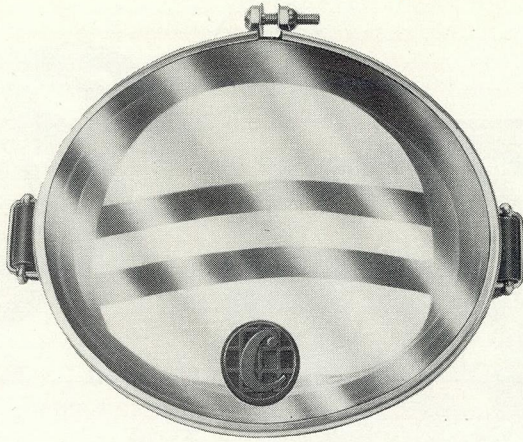

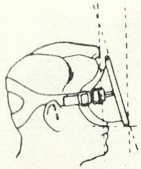

No. 1243
Professional Black Neoprene
\$8.95

The exclusive nose design makes the Pinocchio the ultimate in pressure compensating masks. Accepted and used by the world's leading professional and sport divers. Minimum air displacement will allow up to 25% greater skin diving depth. The double feather edge provides a comfortable and absolute, leak-proof seal. The Pinocchio Professional features molded Neoprene for resistance to oil, wear, salt water and the elements — tempered glass lens — chrome plated "Lens-Lock" band — split headstrap for secure fit.

PANORAMIQUE "CLEAR-EASE"

No. 1224
French Blue
\$5.95

The Panoramique has obtained world-wide acceptance due to its outstanding features. The exclusive "wide-angle" design brings the lens closer to the eyes at a slant that offers undistorted vision over a wider range. The Panoramique "Clear-Ease" incorporates the well-proven "Clear-Ease" non-return valve that allows water to be cleared from the mask while in a normal swimming position. The Panoramique "Clear-Ease" features tempered glass lens—stainless steel "Lens-Lock" band—split head strap for secure fit—comfortable feather edge seal.

DIVE MASKS

HEALTHWAYS

No. 1220
French Blue
\$3.95

No. 1250
Yellow
\$3.95

No. 1270
Professional Black
\$3.95

The Espadon Dive Mask is a high quality, light weight professional mask designed primarily for smaller faces. The Espadon features tempered glass lens—stainless steel "Lens-Lock" band—split headstrap for secure fit—comfortable feather edge seal.

ESPADON

No. 1222
French Blue
\$4.95

No. 1252
Yellow
\$4.95

No. 1272
Professional Black
\$4.95

The exclusive design of the Panoramique "Wide-Angle," the world's most popular mask, brings the lens closer to the eyes at a slant that offers undistorted vision over a wider range. The Panoramique Mask features tempered glass lens—stainless steel "Lens-Lock" band—split headstrap for secure fit—comfortable feather edge seal.

PANORAMIQUE

No. 1228
Blue
\$2.95

The Cressi Star is a high quality, light weight mask that features stainless steel "Lens-Lock" band—safety lens—split head strap for secure fit—comfortable feather edge seal. The best value at this price.

CRESSI STAR

DIVE MASKS

OSTRICA MASKS

**No. 1239
Ostrica Jr.
\$3.95**

**No. 1240
Ostrica Bantam
\$3.50**

The only professionally designed, high quality mask for smaller faces. The Ostrica masks feature tempered glass lens—stainless steel “Lens-Lock” band—comfortable feather edge seal—split headstrap for secure fit.

AQUA CHAMP

**No. 1201
Aqua Champ Special
Blue
\$1.00**

This well-fitting junior mask is molded of high quality rubber with Healthways exclusive “bend edge” design and clear Styrene lens.

**No. 1202
Aqua Champ Sr.
Blue
\$1.50**

The popular round mask features quality rubber compound, “bend edge” design and clear shatterproof lens.

PROFESSIONAL

**No. 1211
Amber Gum Rubber
\$3.95**

The ever popular pioneer of heavy-duty gum rubber dive masks. The Professional features double strength glass lens — stainless steel “Lens Lock” band — extra wide headstrap for secure fit — exceptional feather edge seal.

GOGGLES

**No. 1107
Aqua Pro Goggles
Yellow
\$3.25**

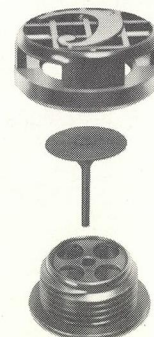

These world famous Goggles are professionally designed for maximum safety and feature quality rubber compound — tempered glass lens — feather edge seal.

**No. 1261-06
Clear-Ease Valve
\$.25**

**No. 1243-07
Cressi Clear-Ease Valve
\$2.00**

WHY RONDINE FINN OUTSELL ALL OTHERS FIVE TO ONE

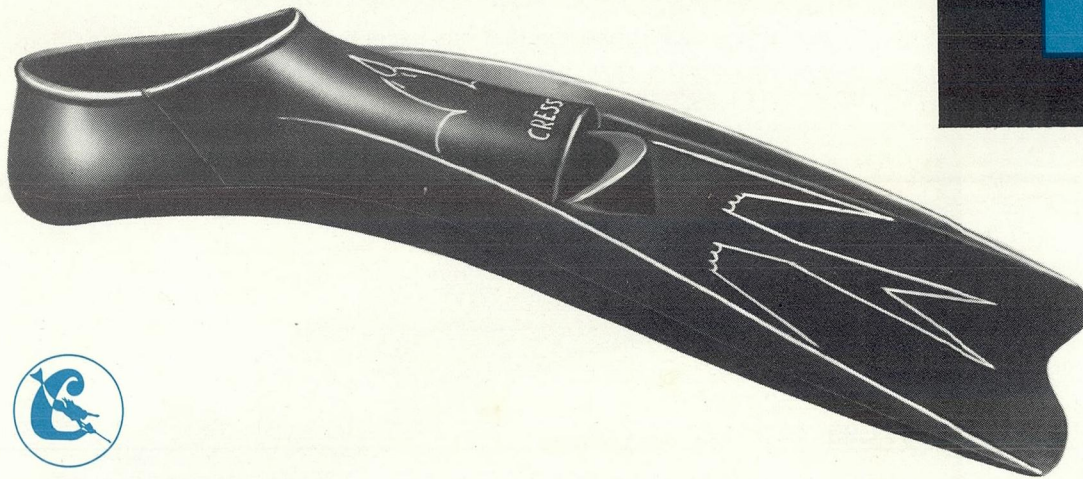

Created by Cressi, the most renowned manufacturer of underwater sports equipment. The Rondine Fins have achieved worldwide acceptance as the finest in design, construction, fit and performance. The scientifically designed Cressi Rondine is the most copied (but never duplicated) fin in the entire history of underwater sports. Only the Cressi Rondine offers these outstanding features:

- Blade angle which provides maximum thrust with minimum effort.
- The original full foot, open toe design which assures a comfortable fit.
- Shoe sizes increase in width as well as length in the proper proportions.
- Light weight — less bulk.
- Specially integrated rubber compounds assure comfortable fit and efficient blade action.

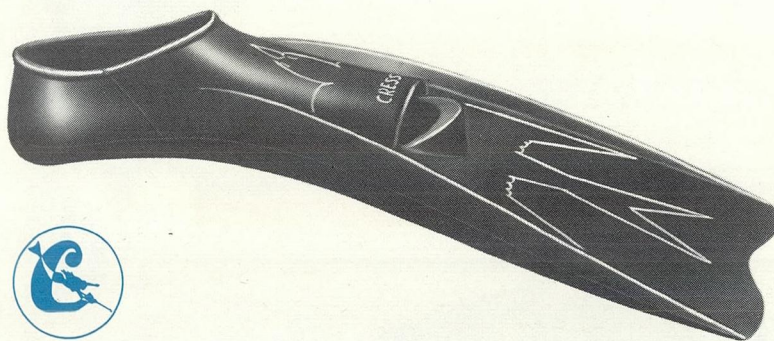

U. S. Patent No. 2737668

RONDINE FINN

HEALTHWAYS

RONDINE JUNIOR

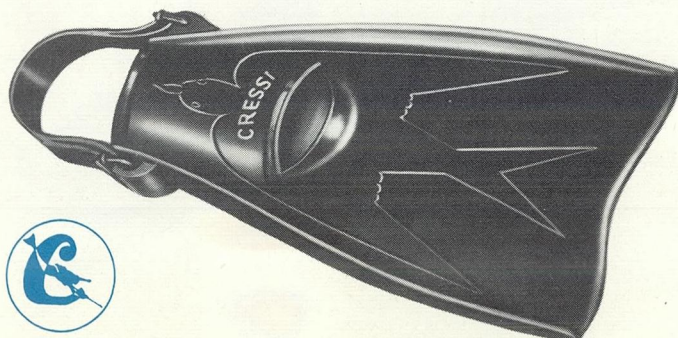

Blue

No. 1373	Size 2-3	\$5.95
No. 1374	Size 3-4	\$5.95
No. 1375	Size 4-5	\$5.95

The Rondine Junior incorporates all the features of the professional Rondine fins, in sizes to fit young people. These light weight fins are exceptionally comfortable.

RONDINE ADJUSTABLE

Blue

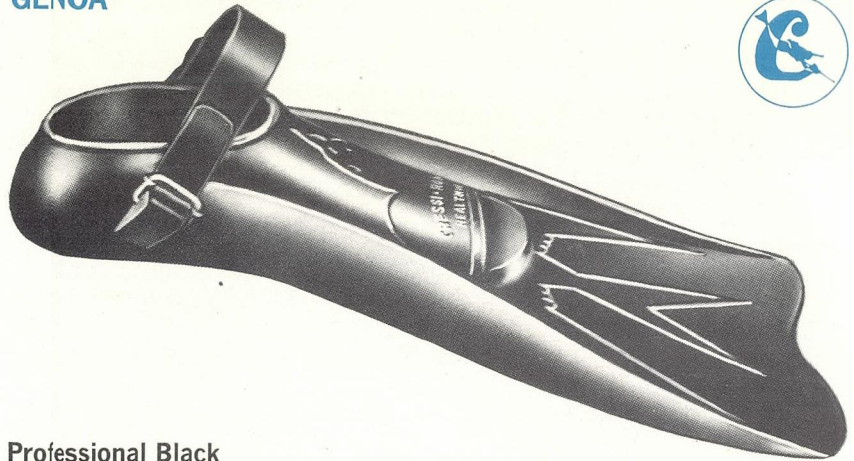

No. 1381	Size 1-5 (small)	\$5.95
No. 1382	Size 5-10 (medium)	\$5.95
No. 1383	Size 10-14 (large)	\$5.95

The Rondine Adjustable was created for the discriminating diver who prefers the adjustable open heel design. The comfortable contoured strap and safety-lock buckle plus the Rondine blade design make this the finest adjustable fin in the world.

RONDINE FINS

GENOA

Professional Black

No. 1330	Size 5-7 (without strap)	\$7.95 ✕
No. 1331	Size 7-9 (without strap)	\$7.95 ✕
No. 1334	Size 9-11 (w/adjustable strap)	\$9.95 ✕
No. 1335	Sizes 11-13 (w/adjustable strap)	\$9.95
No. 1336	Size 13-16 (w/adjustable strap)	\$10.95

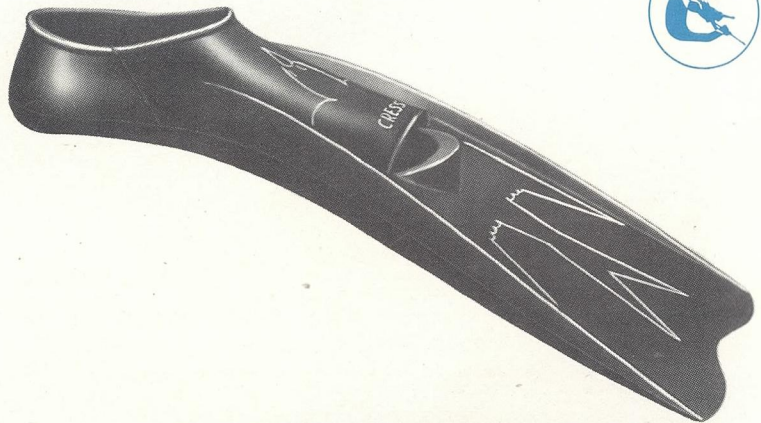

The original black rubber fin that has become a worldwide leader in popularity. The Genoa is designed to provide maximum propulsion from its fin tip and side rigidity and at the same time offer form-fitting comfort.

MEDITERRANEAN

Blue

No. 1350	Size 5-7	\$10.95
No. 1351	Size 7-9	\$10.95
No. 1352	Size 9-11	\$10.95
No. 1353	Size 11-13	\$11.95

Made of floating rubber compound, the Rondine Mediterranean combines the comfort, fin tip rigidity and rugged light weight construction desired by all divers.

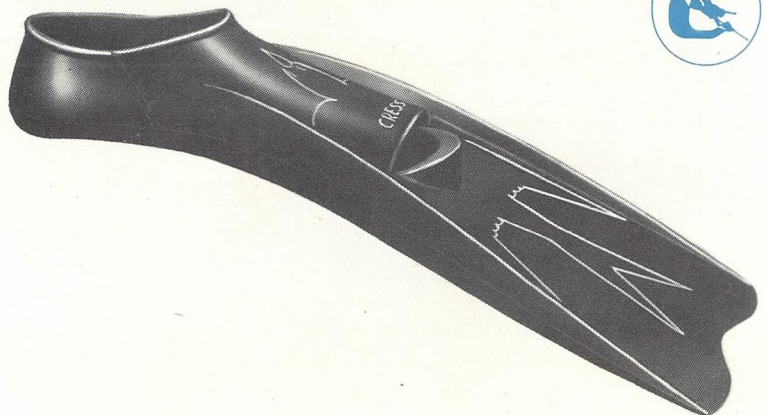

GARIBALDI

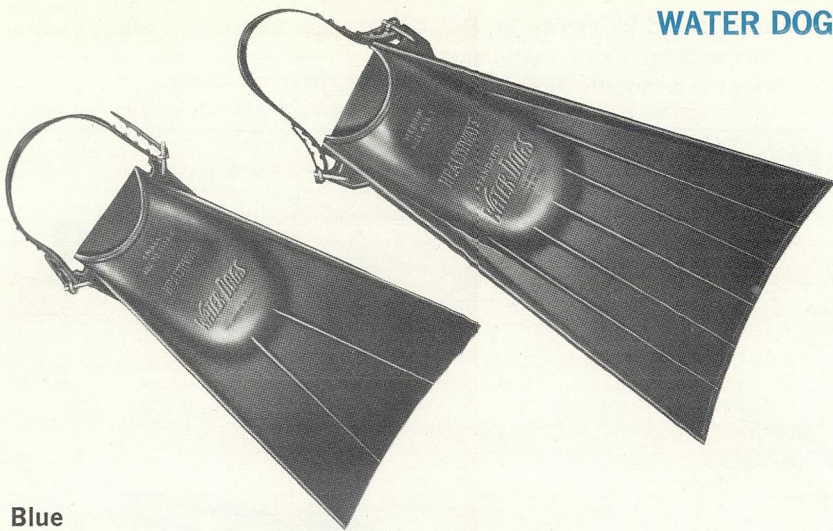

Yellow

No. 1360	Size 5-7	\$11.95
No. 1361	Size 7-9	\$11.95
No. 1362	Size 9-11	\$11.95
No. 1363	Size 11-13	\$11.95

The Rondine Garibaldi is made of a special floating, yellow rubber compound which allows easy identification. It has exceptionally light weight construction, comfort and fin tip rigidity.

WATER DOGS

Blue

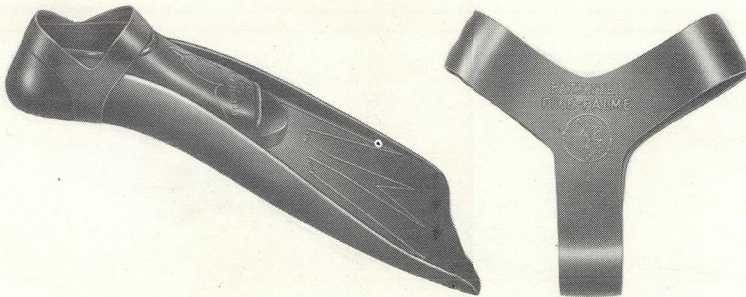

No. 1302	Adjustable to Size 6	\$2.95
No. 1303	Size 4-8	\$3.95
No. 1304	Size 8-13	\$3.95

Healthways Water Dogs combine quality and professional design with exceptional durability and lightness. These all-around fins are molded of a special rubber compound and feature an adjustable strap and non-slip safety buckle.

FINS & ACCESSORIES

HEALTHWAYS

FIXE PALME

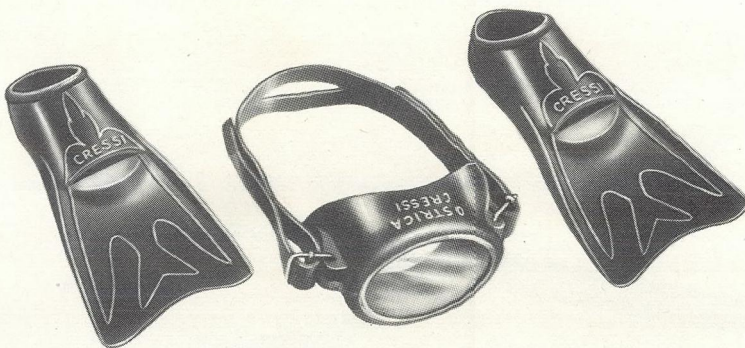

Professional Black

No. 1370	Size 7-11 (medium)	\$1.75
No. 1371	Size 9-16 (large)	\$1.75

The universal Fixe Palme holds any closed heel fin to your foot under the most turbulent conditions. The Fixe Palme provides absolute fin security by holding the fin in three places—instep, arch and heel.

RONDINE MINIATURE

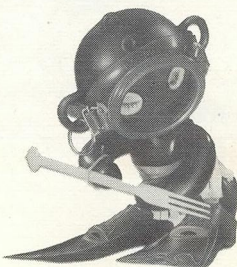

Blue

No. 1237

Cressi Rondine Miniature Fins and Mask Set
\$.95

These detailed miniatures of the famous Cressi Rondine Fins and Mask are much sought after as momentos and are ideal for premiums or promotions.

No. 1281
Skin Diver Doll
\$1.50

No. 1282
Scuba Diver Doll
\$1.95

CRESSI DIVER DOLLS

These clever 5" dolls are popular gifts. They are made of unbreakable Polyethelene and come fully equipped with scale miniatures of the famous Cressi masks, fins, and spearguns.

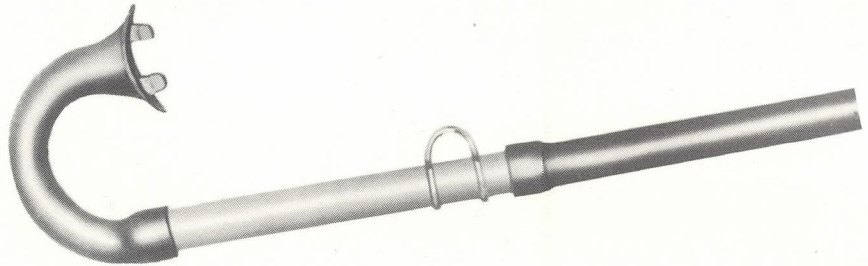

SNORKELS

The snorkel, used primarily by skin divers, is also an important safety device to the Scuba Diver who surfaces with an empty tank. It enables him to breathe normally during that "long swim back to the boat."

CRESSI DELFINO

No. 1430
Blue
\$1.95

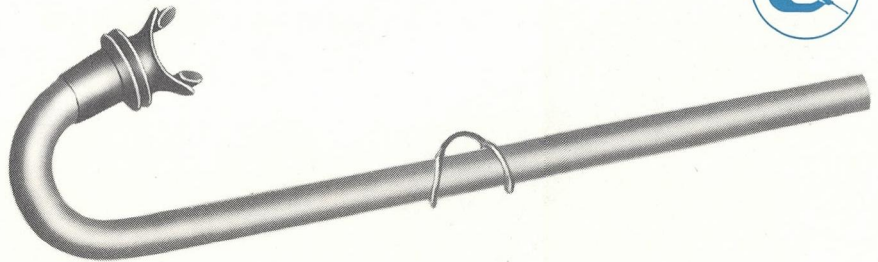

The snorkel preferred by professionals. The Cressi Delfino is made of a one-piece rubber elbow and mouthpiece with a rigid plastic center pipe and a flexible upper section of gum rubber.

CRESSI HAITI PROFESSIONAL

No. 1432
Professional Black
\$1.95

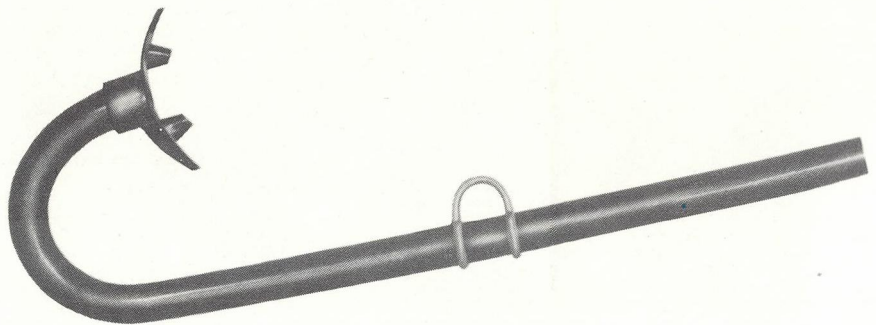

The choice of professional divers in both style and construction. The Haiti Professional is made of the finest quality black rubber combined with a soft, flexible, accordion mouth piece.

SEA SCOUT

No. 1403
Assorted Colors
\$1.00

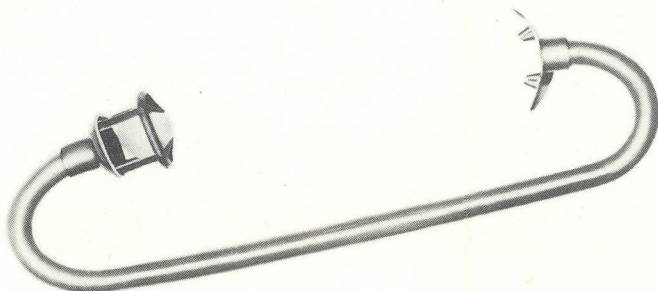

A straight professional type snorkel of durable Polyethelene with a soft vinyl mouthpiece.

SEA DIVE STANDARD

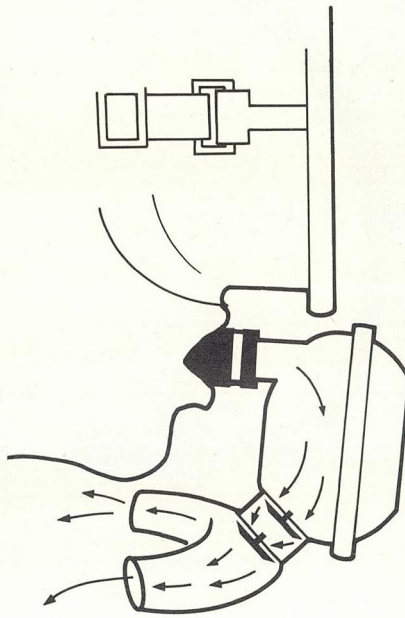

No. 1405
Assorted Colors
\$1.00

A popular professional type snorkel with a soft Vinyl mouthpiece and "check ball" cage.

Healthways exclusive diver proven double exhaust valve has as great a significance as the non-return mouthpiece in a double hose regulator. This unique feature assures the diver of an absolute dry air supply under all conditions. ONLY HEALTHWAYS SINGLE HOSE REGULATORS HAVE THIS ADVANCED SAFETY FEATURE. All Healthways single hose regulators feature a contoured air exhaust to prevent air bubbles from obstructing vision (it is made of chrome plated brass and is permanently attached for maximum safety)—snag proof clearing button to activate the demand valve—nylon reinforced Neoprene diaphragm with stainless steel diaphragm discs — “Quik-Klip” to facilitate inspection and maintenance—leak proof “O” ring seals for maximum safety — newly improved easy turning hose swivel to prevent twisting and kinking of hose. All Healthways second stages are made of heavy gauge chrome plated brass and are impervious to salt water and the elements.

No. 1664
Scuba Star Single Hose,
Two Stage Regulator
\$34.95

Pat. Pending

THE WELL-PROVEN PIONEER OF "O" RING PISTON REGULATORS

The Scuba Star is not limited to "shallow water" or "sport diving," it is professionally designed and engineered to be used comfortably to depths of 200 feet.

FIRST STAGE: The Scuba Star first stage has only one moving part which makes it outstanding in function, simplicity and maintenance. It proved that the troublesome "high pressure block leak" could be eliminated. A depth compensated automatic air reserve "K Restrictor" is assembled into the high pressure block. It can be easily replaced with the "J Restrictor" if the diver prefers to use a constant air reserve valve. A safety relief valve is incorporated into the first stage which eliminates the possibility of over pressurizing the regulator. (This safety relief valve is sometimes referred to as the "third stage" in a two-stage regulator.) The Scuba Star first stage features a high pressure plug which can be removed and the Submersible Gauge installed to enable the diver to know at all times how much air remains in the cylinder while diving. The first stage is machined from solid brass with a forged yoke and screw, and features a heavy chrome finish.

SECOND STAGE: The Scuba Star second stage features Healthways unique double exhaust valves, which assures the diver of an absolute dry air supply under all conditions. The one piece tilt valve demand mechanism provides the diver with easy breathing and offers foolproof simplicity. The Scuba Star second stage features contoured exhaust to prevent bubbles from obstructing vision — "Quik-Klip" to facilitate inspection and maintenance — snag proof clearing button to activate the demand valve — nylon reinforced Neoprene diaphragm with stainless steel diaphragm disc — leak proof "O" ring seals for maximum safety — easy turning hose swivel — high test nylon and Neoprene hose. The Scuba Star second stage is constructed of heavy gauge chrome plated brass, all stainless steel springs, and is impervious to the elements.

Pat. Pending

No. 1665
Scubair Single Hose,
Two-Stage Regulator
\$49.95

SCUBAIR

HEALTHWAYS

THE MOST WIDELY ACCLAIMED REGULATOR IN THE HISTORY OF SELF-CONTAINED DIVING

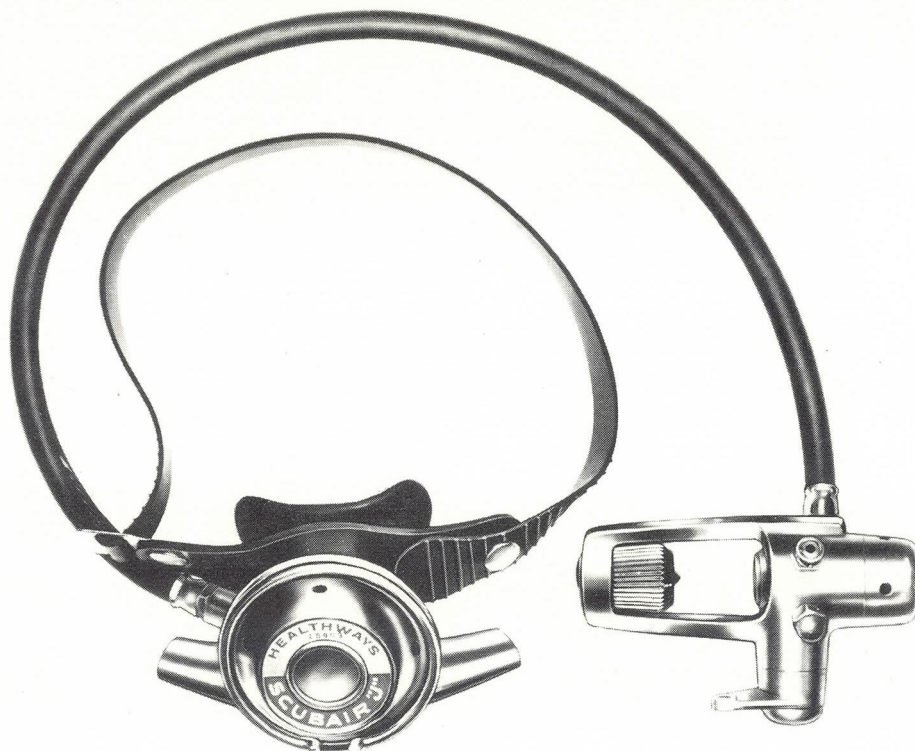

FIRST STAGE: The Scubair first stage has the most efficient and functional design of any single hose regulator. It incorporates the foolproof "O" ring piston pressure reduction mechanism — only one moving part. A manually operated air reserve selector switch enables the diver to adjust his regulator to the automatic depth compensated "Auto Reserve" position or to the "J Valve" position, if the diver prefers to use the constant air reserve valve on his cylinder. (This pre-dive adjustment is to be made before turning on the cylinder valve.) Healthways exclusive internal yoke screw eliminates the conventional wing nut and provides an easily operated, snag proof means of attaching the regulator. Finger tip control is all that is necessary for a complete seal with the modern "O" ring valves. The Scubair first stage contains a high pressure plug which can be removed and the Submersible Gauge attached to enable the diver to know at all times how much air remains in the cylinder while diving. A removable low pressure plug provides for the attachment of an additional second stage for training purposes. The Scubair first stage body is made of chrome plated forged brass, all stainless steel springs and is impervious to the elements.

SECOND STAGE: A "downstream" demand mechanism is engineered into the Scubair second stage to deliver more air than any diving regulator available. This downstream demand valve automatically serves as a safety relief valve in case of an over pressure in the air supply hose. The balanced Venturi system allows the diver to breathe comfortably at any depth with no increase in inhalation effort. The Scubair second stage features double exhaust valves—contoured air exhaust to prevent bubbles from obstructing vision—recessed snag proof clearing button—nylon reinforced Neoprene diaphragm—"Quik-Klip" to facilitate inspection and maintenance—leak proof "O" ring seals for maximum safety—easy turning hose swivel—The Scubair second stage is constructed of heavy gauge chrome plated brass, all stainless steel springs and is impervious to the elements.

Developed by Richard E. Anderson

SCUBAIR "J"

HEALTHWAYS

No. 1662
Scubair "J" Single Hose,
Two Stage Regulator
\$69.95

Pat. Pending

A PROFESSIONALLY ENGINEERED REGULATOR INCORPORATING A BUILT-IN SPRING LOADED CONSTANT AIR RESERVE

FIRST STAGE: The Scubair "J" first stage incorporates a spring loaded constant air reserve mechanism. This mechanism provides the diver with a 300 psi constant air reserve even though his cylinders are not equipped with reserve valves. The Scubair "J" first stage features Healthways exclusive internal yoke screw which eliminates the conventional wing nut and provides an easily operated, snag proof means of attaching the regulator—a removable high pressure plug for attaching the Submersible Scub-Air Gauge that enables the diver to know at all times how much air remains in the cylinder while diving—a removable low pressure plug that provides for the attachment of an additional second stage for training purposes. The Scubair "J" first stage is constructed of a chrome plated forged brass body, all stainless steel springs and is impervious to the elements.

SECOND STAGE: A "downstream" demand mechanism is engineered into the Scubair "J" second stage to deliver more air than any diving regulator available. This downstream demand valve automatically serves as a safety relief valve in case of an over pressure in the air supply hose. The balanced Venturi system allows the diver to breathe comfortably at any depth with no increase in inhalation effort. The Scubair "J" second stage features double exhaust valves—contoured air exhaust to prevent bubbles from obstructing the vision—recessed snag proof clearing button—nylon reinforced Neoprene diaphragm—"Quik-Klip" to facilitate inspection and maintenance—leak proof "O" ring seals for maximum safety—easy turning hose swivel—The Scubair second stage is constructed of heavy gauge chrome plated brass, all stainless steel springs and is impervious to the elements.

SCUBAIR "300"

HEALTHWAYS

Pat. Pending

No. 1663
Scubair "300" Single Hose,
Two-Stage Regulator
\$89.95

THE WORLD'S MOST OUTSTANDING REGULATOR. THE SCUBAIR "300" INCORPORATES HEALTHWAYS UNIQUE SONIC ALARM DEVICE

FIRST STAGE: For the first time in the history of self-contained diving, a regulator features an audible alarm device indicating that the air supply in the tank has reached the minimum reserve level of 300 psi. Until all the air has been exhausted, the alarm device continues to operate. With each inhalation, the loud clicking reminds the diver he is breathing reserve air. WITH THE SCUBAIR "300" THERE IS NO POSSIBILITY OF FORGETTING THIS VERY IMPORTANT AND LIFE SAVING FACT. The minimum reserve pressure of 300 psi is approximately the same as in constant air reserve valves, but with the Scubair "300" there is no necessity of manually switching to reserve air. The Scubair "300" first stage features Healthways exclusive internal yoke screw which eliminates the conventional wing nut and provides an easily operated, snag proof means of attaching the regulator—high pressure plug for attaching the Submersible Scub-Air Gauge which enables the diver to know at all times how much air remains in the cylinder while diving—a removable low pressure plug which provides for the attachment of an additional second stage for training purposes. The Scubair "300" first stage is constructed of a chrome plated forged brass body, stainless steel springs and is impervious to the elements.

SECOND STAGE: A "downstream" demand mechanism is engineered into the Scubair "300" second stage to deliver more air than any diving regulator available. This downstream demand valve automatically serves as a safety relief valve in case of an over pressure in the air supply hose. The balanced Venturi system allows the diver to breathe comfortably at any depth with no increase in inhalation effort. The Scubair "300" second stage features double exhaust valves—contoured air exhaust to prevent bubbles from obstructing vision—recessed snag proof clearing button—nylon reinforced Neoprene diaphragm—"Quik-Klip" to facilitate inspection and maintenance—leak proof "O" ring seals for maximum safety—easy turning hose swivel—The Scubair "300" second stage is constructed of heavy gauge chrome plated brass, all stainless steel springs and is impervious to the elements.

SCUBA

HEALTHWAYS

Pat. Pending

No. 1611
Scuba Double Hose,
Single-Stage Regulator
\$52.95

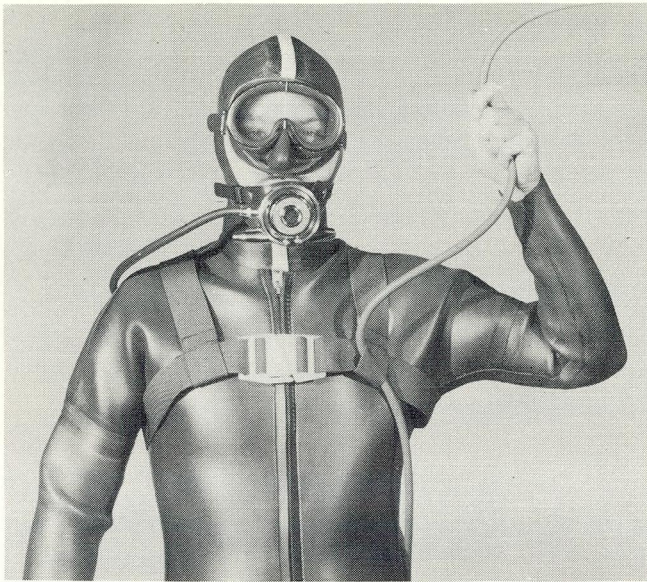

THE SCUBA IS THE MOST POPULAR AND DEPENDABLE REGULATOR IN ITS CLASS

The Scuba incorporates a balanced Venturi system which provides the diver with effortless breathing at any depth. A Venturi air deflector in the mouthpiece prevents involuntary loss of air, common to other single stage Venturi regulators. The Scuba features a simple, efficient, single stage mechanism—pressure balanced exhaust valve for effortless exhalation—a safety non-return mouthpiece—durable Neoprene hose and mouthpiece assembly—Healthways exclusive internal yoke screw which eliminates the conventional wing nut and provides an easily operated snag proof means of attaching the regulator—nylon reinforced Neoprene diaphragm—heavy chrome plated brass and stainless steel construction.

UNCONDITIONAL TWO YEAR GUARANTEE

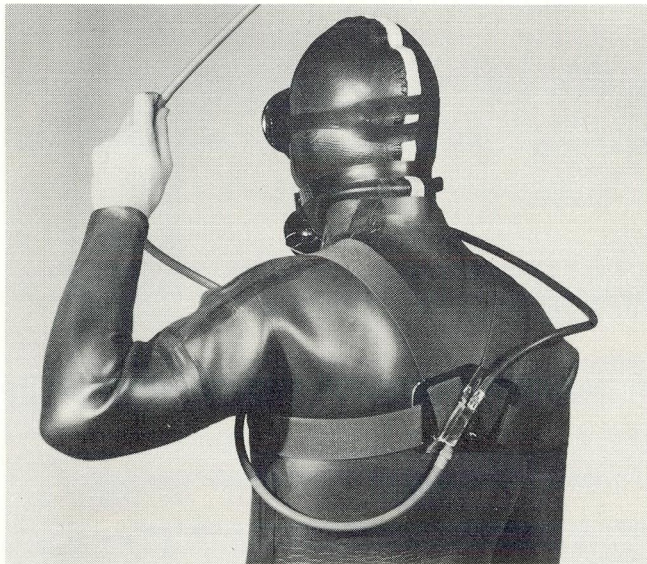

TWO YEAR UNCONDITIONAL GUARANTEE FOR 1963 HEALTHWAYS REGULATORS—THE SCUBA STAR, SCUBAIR, SCUBAIR "J", SCUBAIR "300" AND THE SCUBA.

HEALTHWAYS IS THE ONLY MANUFACTURER OF SCUBA EQUIPMENT TO OFFER AN UNCONDITIONAL GUARANTEE AGAINST DEFECTS IN MATERIAL AND WORKMANSHIP FOR TWO YEARS FROM DATE OF PURCHASE. THIS TWO YEAR GUARANTEE IS THE PROOF OF THE SUPERIOR QUALITY OF HEALTHWAYS PRODUCTS. HEALTHWAYS SCUBA EQUIPMENT IS THE BEST THAT MONEY CAN BUY.

FRONT VIEW

Featured with two inch nylon webbing, which is laced in a manner that gives complete freedom of movement, comfort and adjustability. The ends of the webbing are dipped in Healthways exclusive rubber compound to prevent fraying. The harness is equipped with a newly designed nylon safety buckle.

BACK VIEW

The back plate is made of heavy gauge chrome plated brass. A positive action check valve is silver braised directly on to the back plate before plating which insures that the check valve cannot be torn loose. This is important because in most instances the diver's air hose also serves as his life line. The check valve plays an important part in preventing the air in a diver's respiratory system from being forced back up the hose, should a rupture occur in the air hose at the surface. The check valve plug can be easily removed for inspection and maintenance of the stainless steel spring and check ball. The inlet of the check valve has a standard 1/4" pipe thread to which the diver can adapt any hose connection he may desire to use. The Surface Air Hook-up includes the second stage of a Scuba Star Regulator, harness and back plate with check valve.

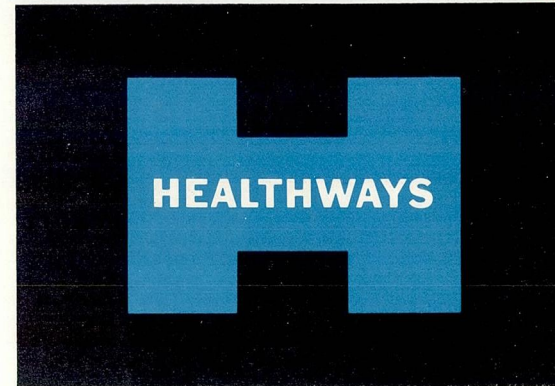

No. 1689
SURFACE AIR HOOK-UP
\$48.00

SIDE VIEW

The surface air hose is brought under the left arm and through the front left webbing loop. This is to prevent a direct right angle pull against the check valve hose fitting, and also to keep the surface hose within reach of the diver for signalling. The Surface Air Hook-up harness is completely independent of the weight belt.

SURFACE AIR HOOK-UP

No. 1688	Surface Air Hook-up Harness	\$25.50
No. 1688-02	Check Valve Complete	9.95
No. 1688-08	2" Blue Nylon Webbing, 4 1/2 Ft. ea. (2 required)	3.00

TANK ASSEMBLIES

PROFESSIONAL TANKS

Healthways Professional Tanks are made from Alloy Steel as required by I.C.C. (Interstate Commerce Commission) specifications. Healthways uses a Chromium-molybdenum Steel, A.I.S.I. No. 4130, which provides the strength and other physical characteristics required by the I.C.C.

There are three tests performed to prove the strength and ductility of the metal. Tensile, Crush and Hydrostatic. All cylinders are continually checked to meet Healthways exacting requirements during the production cycle to ensure proper wall thickness, threads, interior and exterior conditions. All Healthways tanks are galvanized for lasting protection against salt water, exposure and rough handling. Healthways Black Epoxy Tanks are first galvanized for double protection.

SCUBA AIR COMPRESSORS

The Healthways Scuba Air Compressor has been developed after years of research and thousands of hours of testing. The output and durability of the Scuba Air Compressor is incomparable and meets the most stringent requirements. The Scuba Air Compressor will fill a 71.2 cu. ft. tank from 0 to 2250 psi in approximately 13 minutes — faster and safer than any other unit available of comparable size.

The 3 stage, 2000 rpm, Scuba Air Compressor is equipped with two safety devices. One is the pressure-actuated cut off switch set at 2300 psi and the other is a pressure relief valve set at 2500 psi. It has two specially-designed filters: one for the first stage and another for the third stage. The compressor is mounted on a spring loaded frame and weighs approximately 188 lbs. The Scuba Air Compressor comes equipped with Healthways No. 1693 Filter and Gauge Combination with Bleeder Valve.

The Scuba Air Compressor is available with any one of the following power plants.

1. 7 hp Kohler gasoline engine
2. 3 hp electric motor, 110 or 220 volts, single phase
3. 3 hp electric motor, 220 or 440 volts, three phase

HEALTHWAYS

SCUBAPAK HARNESS

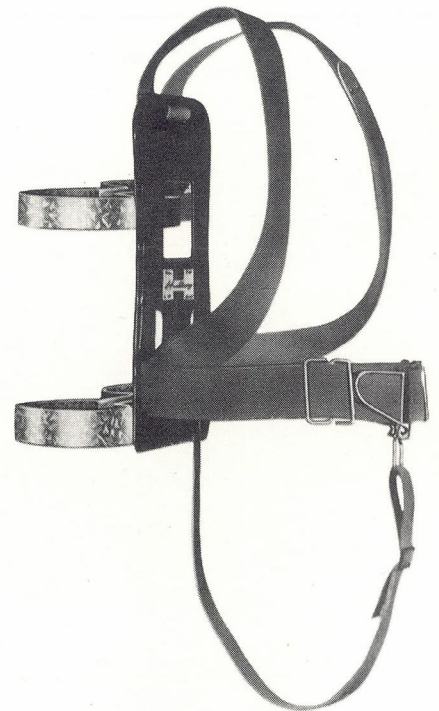

HEALTHWAYS

The Scubapak is made of a single sheet of specially compounded aluminum alloy that provides maximum safety, comfort and utility. A protective coating of resilient high impact Vinyl makes the back plate impervious to salt water and the elements. The Scubapak puts the tank where it should be on the diver's back. The ends of the nylon webbing are dipped in Healthways special rubber compound to prevent fraying. The Scubapak is equipped with Healthways Jet-O-Sen quick release buckle, a crotch strap that may be used at the option of the diver plus a safety release shoulder strap. The Scubapak incorporates two easy-to-carry handles, designed as an integral part of the harness, which make carrying the tank as easy as carrying a suitcase. The single tank harness features Healthways revolutionary new stainless steel "criss-cross" bands. This design provides a more secure tank attachment than the conventional two parallel band arrangement. The "criss-cross" bands incorporate an easy action thumb screw for quick assembly and removal of the Scubapak.

 \$18.50

Healthways Deluxe Contour Scubapak incorporates all the outstanding features of the famous standard Scubapak—nylon webbing—easy-to-carry handles—continuous strap arrangement and the Jet-o-Sen quick release safety buckle. These features are incorporated without adding unnecessary bulk to achieve what a contour pack is designed to do. The Contour Scubapak is designed to eliminate large gaps in the back plate and the result is truly the most comfortable and form fitting contour pack ever developed. The Single Tank Harness features Healthways revolutionary new stainless steel single band design. This design provides a more secure tank attachment and incorporates an instant action quick release latch that allows removal of the Contour Scubapak in seconds.

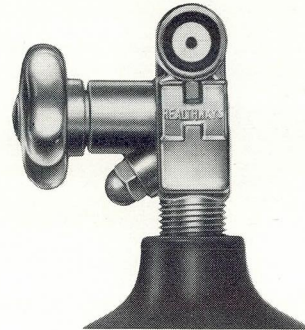

PROFESSIONAL TANK VALVES

Healthways professional valves are designed specifically for Scuba Diving and are the safest and most thoroughly engineered valves available. They are designed by professionals to meet the strict requirements of the discriminating diver. All Healthways valves contain an absolutely foolproof safety plug. (THE ONLY TYPE OF SAFETY PLUG THAT MEETS ICC REQUIREMENTS FOR ALLOWING THE 10% AIR PRESSURE OVERLOAD.) Healthways valves feature a high pressure outlet that is drilled downstream of the shutoff. This permits the diver to remove the high pressure plug and install a submersible pressure gauge while the cylinder is full of air.

HEALTHWAYS

AUTOMATIC DECOMPRESSION METER

With Healthways Automatic Decompression Meter there is no need to worry; you can always be sure. The precision instrument that functions automatically like an "electronic brain" — continuously memorizing repetitive and multiple depth dives. The Automatic Decompression Meter takes the guess work out of planning your dive. It records the two essential elements for each dive . . . TIME and DEPTH, automatically calculates these two factors and immediately indicates the necessary decompression time. The Automatic Decompression Meter reproduces the physiology of the body by duplicating the rate at which the nitrogen goes into and out of solution in the blood stream. Keeping an exact record of the dive just completed and of the time you spent on the surface between dives, it uses the diving time as well as the surface time to automatically calculate and prescribe the decompression time necessary on the next dive. This process of memorizing continues for 6 hours after the last dive you make. The compact unit can be worn on the arm or attached to your harness.

No. 1973
AUTOMATIC DECOMPRESSION METER
\$49.95

"BIG JIM" DIVERS FLAG/BUOY

DIVING
SAFETY SECTION

HEALTHWAYS

The "Big Jim" Divers Flag/Buoy combines the conventional divers flag and a new inflatable marker buoy into one compact and functional unit. It is inflated by means of a single, easy to operate, trouble-free plastic push-pull valve. The "Big Jim" Divers Flag/Buoy is designed with a two-inch belt and buckle assembly that is permanently sealed to the base for attaching a conventional 2-lb. weight. This weight insures that the flag floats upright at all times so that passing boats and other divers in the area can easily see it. A brass grommet is located near the water line which ensures towing and anchoring without upsetting the flag. The "Big Jim" Divers Flag/Buoy when deflated can be folded into the size of a handkerchief and be carried in a pocket or similar small place.

Designed by "Big Jim" Christiansen

SCUBA-VEST LIFE JACKET

DIVING
SAFETY SECTION

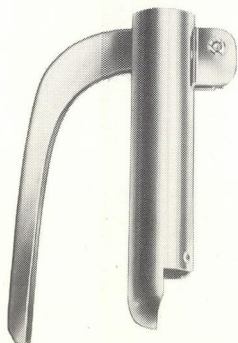

HEALTHWAYS

No. 1988
SCUBA-VEST LIFE JACKET
\$9.95

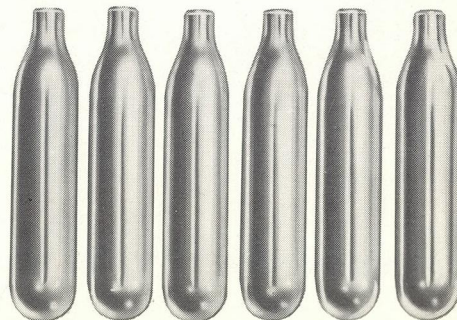

Designed by Jim Christiansen, one of America's foremost advocates of diving safety. The Scuba-Vest is made of specially prepared material, the inside of which is completely saturated with a specially compounded leak proof and corrosion proof heavy coating. The Scuba-Vest is engineered to float an unconscious or resting diver in a "face-up" position. Experience has shown that although the Scuba-Vest is primarily a safety device it can be utilized for "that long swim back to the boat."

The Scuba-Vest is reversible. One side is professional black, the other side is officially approved International Orange, the most vivid of colors for diving safety. In an emergency the diver wearing the black side out can easily reverse the vest to show the orange side out for easy identification. The Scuba-Vest is inflated by means of a "Squeeze Grip" detonator containing an oversized cadmium plated CO₂ cartridge. The re-usable detonator can be easily removed and a new CO₂ cartridge installed ready for instant re-use.

SUBMARINES

HEALTHWAYS

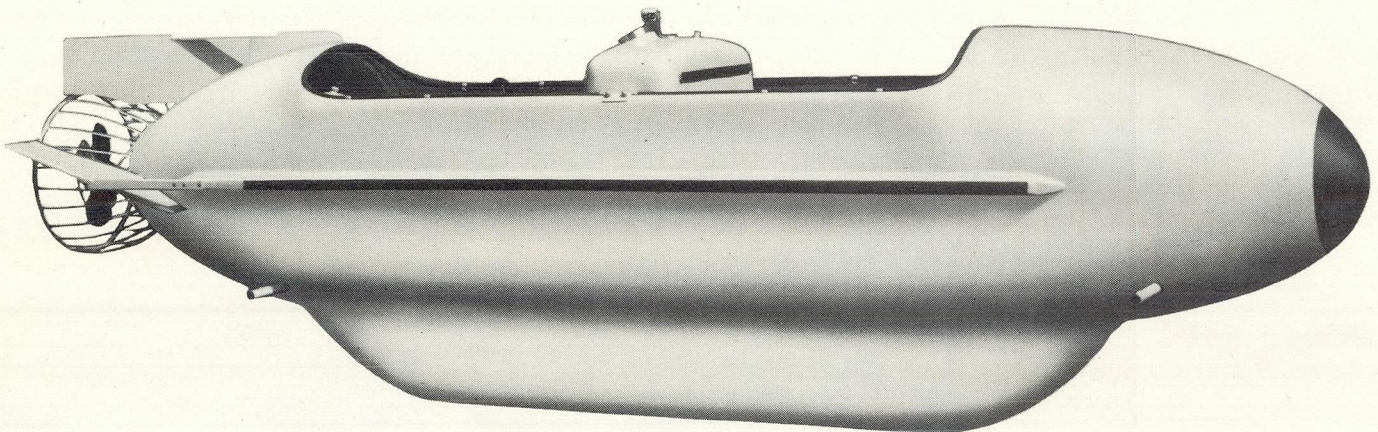

Healthways Submarines are the ultimate in underwater transportation for the SCUBA diver. They are the result of many years of research and development by Healthways and their Italian manufacturer C.O.S.M.O.S.

Healthways Two-Man Submarines are constructed of heavy duty fiberglass and special aluminum alloy metalwork. They are 14 feet long with a 32-inch beam and weigh approximately 500 lbs. The Submarine can be easily moved to and from the water with four divers by the two removable carrying bars.

Healthways Two-Man Submarines are controlled by an aircraft type control stick. To "dive" the pilot pushes the control stick forward, and to surface, the pilot pulls the control stick back.

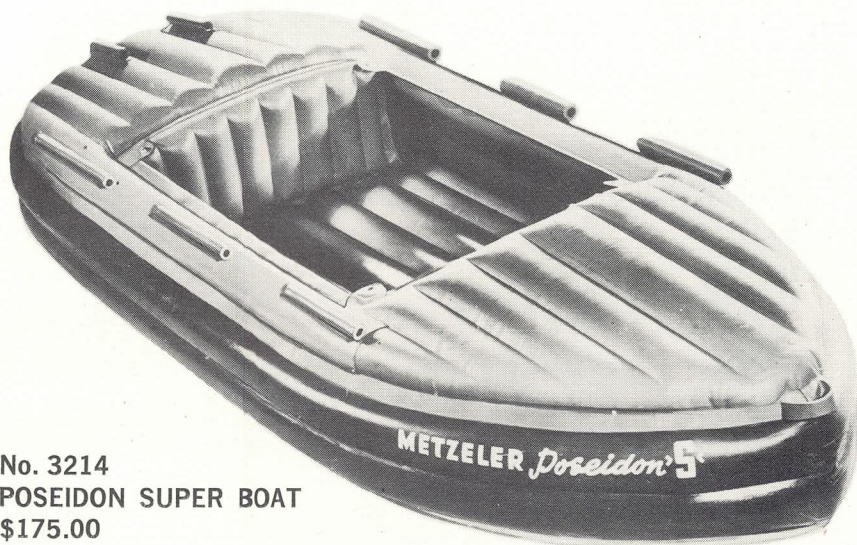

Standard Equipment on Healthways Two-Man Submarines include:

- 4 Standard 12 Volt Batteries that power the Submarine for a minimum of two hours and can be recharged at any service station.
- A 48 Volt Electric Motor of 1.8 HP, 3400 RPM equipped with a 5-1 reduction gear. The motor is operated by a switch that provides two speeds forward and two speeds reverse.
- Built in Depth Gauge and Compass.
- Lead ballast to maintain an even keel.
- Built-in compressed air tank for buoyancy adjustment.

AQUAFEMME "NYLO-FOAM" NEOPRENE SUIT

2 Piece suit made of 3/16" heavy duty, high stretch, double skin foam Neoprene with durable "four way stretch" nylon lining for added strength and tear resistance. The nylon is molded to the Neoprene by Healthways exclusive "heat cure" process to form a permanent bond. Aquafemme "Nylo-Foam" suits feature: Custom form fitting design—Stripping on the inside for maximum seam strength—"Easy-to-put-on" design—Heavy duty giant zipper in shirt front.

0612	Medium	19.50
0613	Large	19.50
0614	X-Large	19.50

GLOVES

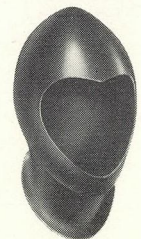

Made of heavy duty foam Neoprene. They provide maximum finger dexterity and feature a heavy duty zipper for ease in putting on and removing the gloves.

No.	Size	Price
0700	Small	\$6.50
0701	Medium	6.50
0702	Large	6.50

"NYLO-FOAM" HOOD

Made of heavy duty foam Neoprene with "four way stretch" nylon lining on the inside. The extra long, contour design allows the hood to be worn inside the suit to form a tight seal and eliminate the exchange of water.

SEA HUNT POINT OF PURCHASE DISPLAY

The Sea Hunt Point of Purchase Display is professionally designed to provide a complete skin diving department in one unit. Each of the items chosen for the Sea Hunt line is personally endorsed by Lloyd Bridges. An autographed photo of Lloyd is prominently displayed on the attractive rack sign as well as the unit cartons. The colorful display panel holds each item and shows suggested retail price. The sturdy Unichrome plated wire rack is scientifically engineered to provide a maximum display in a minimum amount of space.

SALES ORGANIZATION

Healthways revolutionary products are presented in sales inviting packages that have won more national awards than any other sporting goods manufacturer. The packages are presented in bold, bright colors which permit instant recognition of contents. They are ideal for the construction of Point of Purchase Displays, window trimming, etc. Healthways also assists you with unparalleled dealer support by national advertising, radio, television, point of purchase and advertising displays.
