1968 SKIN & SCUBA DIVING

SKINDIVING IS AMERICA'S FASTEST GROWING PARTICIPANT SPORT

A modern definition of a "Skindiver" is any person who swims under water for any purpose and with any type of equipment. Skindiving has been practiced in one form or another since the beginning of history, yet it is only during the past 15 years that a new approach to diving, through the development and refinement of equipment and a greater understanding of the underwater environment, has made it possible for millions of people to enjoy this fascinating activity. Skindiving is now rated as the fastest growing participant sport in America.

What are some basic reasons for this phenomenal growth?

- * Skindiving is easy. Modern underwater enthusiasts include entire families—people of virtually all ages, with a wide variety of abilities.
- * Skindiving provides an entirely new dimension of fun. The diver enjoys the thrill of moving easily in either of the three dimensions, ignoring the restrictions of gravity, his body gently supported by the enveloping water. This thrill of weightlessness cannot be duplicated except in outer space.
- * There are varying degrees of participation in diving. The diver can be as adventurous and exploratory, or as conservative and cautious, as he chooses. He can use the simple mask, fins, and snorkel, or add the more sophisticated equipment as his requirements and tastes demand.

- * The skindiver gets greater enjoyment from his activity as he develops in skills, knowledge and diversification of activities. Certainly no other sport approaches diving in its limitless opportunities for new experience and growth—underwater "sightseeing," exploration, photography, hunting, cave-diving, wreck-diving, treasure hunting, spearfishing, shell collecting, are only a few, not to mention the enjoyment of the ever present camaraderie of the "diving clan."

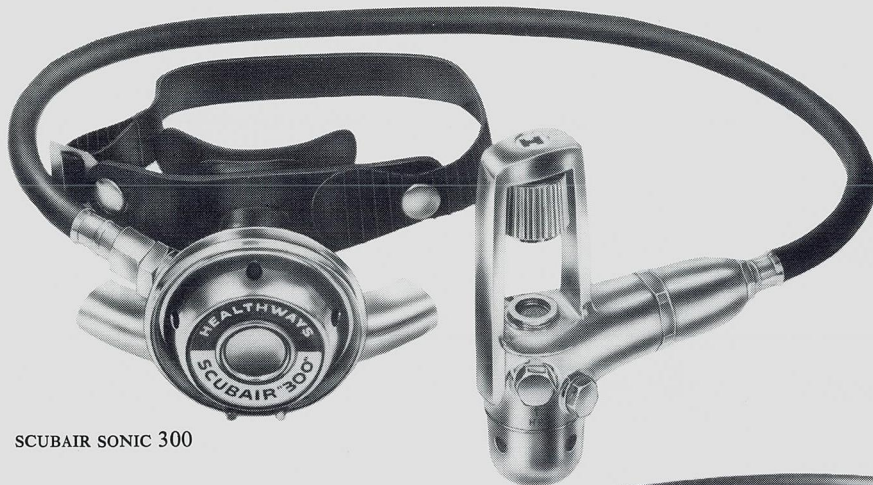

- * Diver training courses are now available all over America. The YMCA's, colleges, universities and public sponsored organizations train a great mass of new divers every year. The professional dive shops, pioneers in the conduct of diver training programs, constantly create and promote a wide range of constructive diving activities.

- * Diving enjoys a vast amount of publicity through magazines, newspapers, and TV shows familiar to everyone. The U. S. Government and major industries are now spending hundreds of millions in oceanographic research and in the development of ultra sophisticated equipment to be used in scientific studies, industry and defense. Universities are offering undergraduate and graduate courses of study of "inner space."

Men's efforts to harness the limitless potential of the sea, to extract its food, minerals and countless other resources, have gained momentum to the point where we are truly on the threshold of the "Hydro-Space age." No other area of human activity has as great potential for the benefit of all people.

SCUBAIR SONIC "300" & SCUBAIR "J"

SCUBAIR SONIC 300

SCUBAIR J

HEALTHWAYS—PIONEER AND LEADER IN THE SINGLE HOSE REGULATOR FIELD

The development of the "single hose" type regulator to its current high level of excellence is a compliment to American engineering foresight and ingenuity. Healthways' engineers early recognized the functional advantages of the "single hose" and devoted their talents to creating the industry's finest. Experience proves their sound judgment; single hose regulators predominate in the American market today and continue to grow each year in sales and diver acceptance.

Healthways regulators are distinctive in their simplicity of design, unmatched in ease of inspection and maintenance. The 1968 line of regulators, from the superb Sonic 300 to the sturdy, dependable Scuba Star TD, are equipped with second stages which feature "downstream" demand valves engineered to provide maximum air supply at any depth or tank pressure with minimum breathing effort.

Healthways regulators combine unmatched aesthetic beauty with the most rugged stainless steel and chrome brass construction throughout.

THE SONIC 300 REGULATOR

First Stage: Healthways famous "Sonic 300" is the first and only successful regulator yet developed that provides a clearly audible sonic alarm which alerts the diver that his tank pressure has been depleted to 300 PSI.

This advanced and only truly modern regulator is used and favored by divers who demand the ultimate in safety and all around excellence in performance — whether they be astronaut, military, ocean science, commercial or sport divers.

The Sonic 300 is the most sophisticated scuba diving regulator in the world today.

The Sonic 300 provides these exclusive features:

- * The fully automatic reserve mechanism eliminates the manual manipulation required in the "J" type reserve.
- * During each inhalation effort after the tank pressure reaches 300 PSI, a continuous clicking sound reminds the diver that he is breathing reserve air; there is no possibility of forgetting.
- * The sonic alarm alerts the diver's buddy that he is on reserve and ready to start a safe ascent.
- * Elimination of the pull-rod assures a full tank of air each time the cylinder is filled.
- * The "Sonic 300" diver enjoys the economy of a less expensive "K" valve tank for his original and each successive tank purchase. The Sonic 300 can be used with a "J" tank valve with the "J" reserve lever in the "down" position.

1663 Scuba Sonic 300 \$100.00

THE SCUBAIR J REGULATOR

First Stage: The Scubaair J first stage incorporates a spring loaded mechanism providing the diver with a 300 PSI constant air reserve, even though his tanks are not equipped with reserve valves.

The Scubaair J diver enjoys the economy of the less expensive "K" valve tank for his original and each successive tank purchase.

High pressure outlet for a submersible tank pressure gauge. Chromed brass, stainless steel construction throughout.

The Scubaair J, with its constant reserve mechanism, enjoys universal popularity.

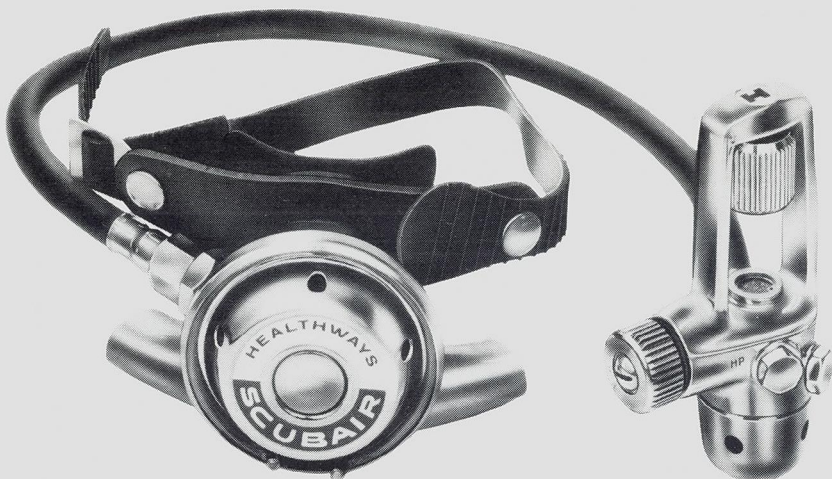

1662 Scubaair J \$80.00

THE SONIC 300 AND SCUBAIR J SECOND STAGES

The "Scubaair 300" and "Scubaair J" second stages incorporate a "downstream" demand valve engineered to provide the diver with maximum air supply at any depth or tank pressure with minimum breathing effort. The mechanism also serves as a safety relief valve in case of an overpressure in the air supply hose.

- * Contoured air exhausts with double exhaust valves.
- * Recessed purge button enables the diver to clear water from the unit instantly.
- * The Quik-Klip feature allows easy removal of the cover for inspection.
- * All hose connections have O-ring seals.
- * Chromed brass and stainless steel construction throughout.

SCUBAIR & SCUBA STAR TD

SCUBAIR

SCUBA STAR TD

THE SCUBAIR REGULATOR— WITH AUTOMATIC DEPTH COMPENSATED RESERVE

First Stage: The Scubair first stage features a pre-dive, manually operated air reserve selector switch which enables the diver to adjust his regulator to the "K" automatic depth compensated reserve position when diving with a "K" tank valve, or, to the "J" position when diving with a "J" constant air reserve tank valve.

When set at "K" position, the air is released to the diver through a very small orifice. When the air supply in the tank nears depletion and the diver experiences the normal increased breathing resistance, he must then start his ascent to the surface. The effect of the depth compensated reserve, (the smaller orifice) then comes into play; it has automatically retained more residual air in the tank for the diver's consumption as he ascends to the surface.

When diving with a "J" tank valve, the selector switch should be set at "J" position; the diver then breathes through a larger orifice and has the 300 PSI constant air reserve available for surfacing.

1665 Scubair Regulator \$65.00

THE SCUBA STAR TD*

*Total Demand Regulator

First Stage: The Scuba Star TD, with its piston type first stage with one moving part, is the ultimate in simplicity of design and ease of maintenance.

Second Stage: The Scuba Star TD second stage now features the easier breathing "downstream" demand valve.

This rugged, dependable, easy breathing regulator is a truly professional diving unit; it is America's most popular regulator in the economy class.

1667 Scuba Star TD Regulator \$49.00

SCUBAIR AND SCUBA STAR TD SECOND STAGES

The Scubair and Scuba Star TD Second stages incorporate a "downstream" demand valve which provides the diver with maximum air supply at any depth or tank pressure with minimum breathing effort. The mechanism also serves as a safety relief valve in case of an over-pressure in the air supply hose.

The recessed purge button enables the diver to clear water from the unit instantly. The Quik-Klip feature allows easy removal of the cover for inspection.

- * All hose connections have leak-proof O-ring seals.
- * Contoured air exhausts with double exhaust valves.
- * Chromed brass and stainless steel construction throughout.

GALVANIZED W/"K" VALVE

YELLOW W/"J" VALVE

TANK ASSEMBLIES

Healthways tanks are drawn from the finest heat treated chrome molybdenum steel as required by ICC specifications. Three tests are made to prove the strength of the metal: Tensile, Crush and Hydrostatic. Every Healthways cylinder meets exacting requirements of wall thickness, threads, interior and exterior conditions.

SAFETY YELLOW TANKS

are etch primed to insure an even bond, primed again with a Synchrochrome coating for added rust resistance, and then a final coat of yellow epoxy is applied for a fine, smooth finish.

Each Healthways cylinder has 15/16" valve openings for easy interior inspection. All valves are 3/4" "O" ring sealed with straight threads to prevent damage when removing valves for inspection or maintenance. No sealing compound is required; a small hand wrench can be used to remove or reseal the valves.

TANK BOOT

Made of a flexible, black, nonmarking polyethylene, the Tank Boot protects the bottom of the tank; provides a convenient stand.

1448 Tank Boot \$3.95

BARE TANKS

TWIN "J" VALVE

THE QUIK-CAM SCUBAPAK

The Quik-Cam Pak with its unique contoured back rest provides extreme lightness and durability with maximum form-fitting comfort. The weight of the tank is distributed between the small of the back and the shoulder straps. There is no strain or feeling of stress at any one point.

The 300 series stainless steel tank band assembly is fully adjustable. The cast aluminum cam lever handle with its unique ball lock device prevents slipping after it is adjusted to the tank.

The harness is made of nylon cam webbing with safety release shoulder strap and stainless steel "Jet-O-Sen" safety buckle. No other type buckle provides the *positive* safety release of the Jet-O-Sen.

1449 Quik-Cam Scubapak \$20.00

TWIN CONTOUR SCUBAPAK

Twin 71.2 tanks ride comfortably and in balance on the diver's back because the contoured back rest and harness design distributes the weight between the small of the back and the shoulder straps. Nylon cam webbing harness, safety release shoulder strap. Jet-O-Sen safety buckle. Galvanized twin band assembly.

1446 Twin Contour Scubapak \$26.00

THE SCUBAPAK HARNESS

The popular Scubapak is a comfortable, rugged pak that has earned universal acceptance of the divers.

Vinyl coated aluminum back rest. Adjustable stainless steel tank bands; Nylon cam webbing harness with safety release shoulder strap, special crotch strap. "Jet-O-Sen" *positive* quick release belt buckle.

1443 Scubapak Harness \$16.95

TANK PRESSURE GAUGE

Measures the diver's air supply before and after diving. Equipped with bleeder valve. Molded neoprene cover provides shock-proof durability.

1614 Tank Pressure Gauge and Yoke \$16.95

COMPETITION JACKETS

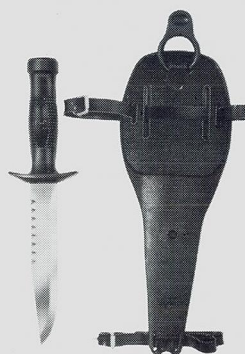

SCUBA VEST JACKET

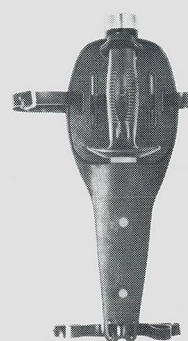

COMPETITION DEPTH GAUGE

BALBOA DEPTH GAUGE

COMPETITION KNIFE & SHEATH

W/HEAVY DUTY KNIFE

BALBOA KNIFE & SHEATH

COMPETITION FLOATATION JACKET

Designed to strict military specifications. Constructed of high tensile strength orange nylon. Air retention characteristics are twice the government specifications required.

Each vest is factory inspected and tested for strength of seams and air retention. Heavy duty brass zipper. Foam neoprene lining inside the collar to prevent chafing. Oral inflation tube closes automatically. Large, threaded, 16 gram cartridge screws into the snagproof, leak-proof firing mechanism.

- 1982 Competition Floatation Jacket w/one detonator and cartridge \$28.00
- 1990 Competition Floatation Jacket w/Twin detonators and cartridges \$40.00
- 1982-01 16 Gram CO₂ Cartridge for Nos. 1982 and 1990 \$.85

SCUBA VEST FLOATATION JACKET

The Scuba vest is a long proven floatation device made of specially prepared orange colored, tight weave cotton laminated with heavy vinyl plastic waterproofing.

Vest can be inflated through an oral inflation tube or by a "squeeze grip" detonator that allows easy removal and replacement of the 12 gram CO₂ cartridge. Each vest is factory inspected and tested for strength of seams and air retention.

- 1980 Scuba Vest \$15.95
- 1983 12 gram CO₂ Cartridge for No. 1980 Scuba Vest \$ 1.80 (pkg. of 6)

COMPETITION KNIFE AND SHEATH

The Competition Knife blade, with one sharp cutting and one serrated edge, is made of Series 300 stainless steel, guaranteed not to rust. The sure-grip handle, with a large, flat, beveled head, is molded in high impact polyallomer. You can hammer on any hard surface without chipping it.

The knife feels balanced in the hand; it has great strength for prying, hacking and digging. The contoured vinyl sheath, worn on leg or belt, provides a large rubber retainer tab for easy grip and maximum security.

- 1998 Competition Knife & Sheath \$ 9.95
- 1999 Competition Knife with stainless steel Head & Sheath \$11.95 (for those who prefer the heavier metal head)

BALBOA KNIFE AND SHEATH

This compact utility knife with sheath is popular with divers, fishermen and hunters. The strong blade is made of Series 300 stainless steel, guaranteed not to rust.

- 1995 Balboa Knife & Sheath \$ 7.50

LEAD WEIGHTS

- 1943-01 2 lb. Lead Weight 2.10
- 1944-01 3 lb. Lead Weight 3.10

COMPETITION 200 ft. DEPTH GAUGE

This accurate, leak proof, Bourdon tube gauge is double sealed in a compact, stainless steel case. Each gauge is pressure chamber tested for accuracy before leaving the factory. Medium priced, yet dependable, this is the most popular type depth gauge in the industry.

- 1966 Competition 200 ft. Depth Gauge \$13.95

BALBOA 250 ft. DEPTH GAUGE

This simple, fool-proof gauge with no mechanical parts, works on the water column principle for absolute accuracy. It is gaining rapidly in popularity among the divers.

- 1965 Balboa 250 ft. Depth Gauge \$ 5.95

THE "JET-O-SEN" 12 lb. WEIGHT BELT

The "Jet-O-Sen" is the truly *positive quick release safety buckle*. Made of extra heavy, smoothly finished, stainless steel wire, it is designed to hold securely in the closed position, yet the weight belt can be released quickly at the divers discretion.

The complete weight belt includes four 3 lb. lead weights, 2" belt of cam webbing nylon and "Jet-O-Sen" safety buckle.

- 1942 "Jet-O-Sen" 12 lb. Weight Belt \$15.95
- 1942-02 "Jet-O-Sen" Buckle and Belt only \$ 3.95
- 1942-04 "Jet-O-Sen" Safety Buckle \$ 1.50

WET SUITS

Today's sophisticated underwater enthusiasts dive in comfort 12 months of the year, in any region of the globe. The "Wet Suit" is now standard equipment for the novice or experienced "pro." The foam neoprene material with its millions of tiny air bubbles, provides insulation that prevents loss of body heat, thus conserving the diver's energy and permitting longer, safer dives; its buoyancy characteristic simulates a floatation device, holding a swimmer chest high at the surface.

HEALTHWAYS "NYLO-FOAM." Rubber chemists have perfected the techniques for securely bonding a 4-way stretch nylon lining to the foam neoprene material to provide added strength and tear resistance. This lining also permits the diver to slip into his suit quickly and remove it just as easily. **All Healthways dive suits are nylon lined.**

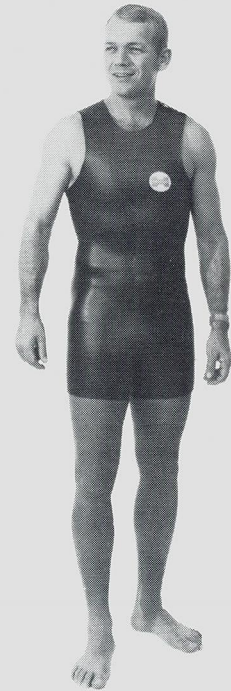

TEX-SKIN

SEALSKIN

MEN'S SKI JACKET

MEN'S SURFER SUIT

HEALTHWAYS NEW WET SUIT DESIGN

There are numerous subtleties of wet suit technology, but the number one requirement is to build a suit from a pattern designed to blend the garment to the body contours and provide a range of sizes to assure a snug, comfortable fit for the greatest number of divers. Healthways new wet suits are outstanding in this basic aspect of wet suit excellence.

Healthways 1968 model suits feature zippers positioned on the inside of the wrists and ankles for greater ease of zipping for entry or removal.

SHIRT FEATURES:

- * High inset collars, seal skin inside, nylon outside.
- * Inset gussets at armpits for extra comfort and freedom of movement.
- * Contoured fit at shoulder, chest, back, waist and forearm.

PANT FEATURES:

- * Legs fit high at the crotch.
- * Contoured snugness at the thigh.
- * Fully contoured at knee and calf of leg.
- * Extra high waist. No stress or pull at waist, hips or legs.
- * Full, comfortable crotch with special liner for comfort and strength.

CONSTRUCTION FEATURES: of all Healthways Dive Suits:

- * All are nylon lined.
- * All heavy duty, nickel silver zippers.
- * All "nylo-foam" zipper liners throughout.
- * All zipper seams double stitched.

TEX-SKIN 5 ZIPPER SUITS, SHIRT AND PANTS, NYLON LINED

The Tex-Skin material, with its textured surface for greater scuff resistance and its greater resilience for comfort and freedom of movement, is today's ultimate in wet suit materials. No single product has gained greater acceptance among sophisticated divers who demand the best.

CRESSI RONDINE FINS

COMPETITION

GENOA AND MEDITERRANEAN

CRESSI DIVE FINS

Out of every sport and every industry, famous names emerge that symbolize excellence and through the years maintain the image of unquestioned top quality. Cressi Rondine Fins enjoy such a name; they out-sell any other brand 5 to 1 in the world market. No other item of diving equipment enjoys such universal acceptance.

The classic Cressi design, coupled with the highest quality rubber, results in fins relatively light in weight, yet they provide the powerful whip and blade snap for amazing underwater propulsion.

Cressi features:

- The original open-toe design footpocket, molded in highest quality, resilient rubber for unmatched comfortable fit.
- Expertly integrated rubber compounding provides longer life and resistance to "aging" and the affects of sun and salt water.

THE COMPETITION DIVE FIN

The rugged, powerful Cressi Competition is the favorite of the finely conditioned diver who demands extra power through maximum blade thrust, yet requires extreme comfort for his longer dives.

Healthways' rubber chemists have developed a new, unique blending of three types of rubber for the Competition model fin — soft, flexible foot pocket, strong, resilient rubber side rails along the foot pocket for whipping blade action, and still another compound for the lower side rails and fin blade. The result is amazing power, with the fin doing most of the work for the diver.

Competition fins are equipped with Fixe Palme Straps for absolute security under most turbulent conditions.

1385 Competition Black 7-9	\$16.50
1386 Competition 9-11	\$16.50
1387 Competition 11-13	\$17.50
1388 Competition 13-16	\$17.50

1390 Fixe Palme Straps 7-11	\$2.50
1391 Fixe Palme Straps 9-16	\$2.50

GENOA AND MEDITERRANEAN FOOT FINS—THEY FLOAT

The famous Genoa and Mediterranean fins, made of highest quality floating rubber, are produced in molds that provide large, roomy footpockets, high at the heel and arch to comfortably fit the diver with or without boots. The angle, length and width of the blade combined with the extreme liveliness of the rubber, provides spring-like blade action for virtually effortless dives. These floating rubber fins, although comparatively light in weight, are strong and durable.

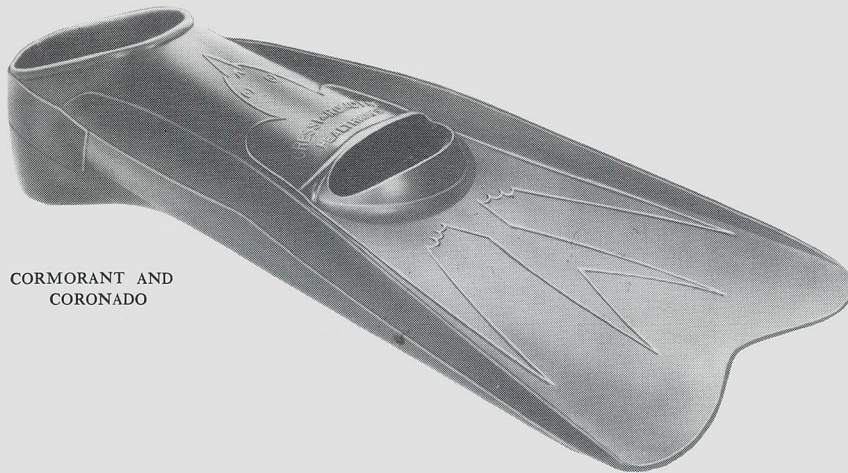

GENOA. BLACK, FLOATING FINS

1365 Genoa. 5-7	\$10.95
1366 Genoa. 7-8½	\$10.95
1367 Genoa. 8½-10	\$11.95
1368 Genoa. 10-12	\$12.95
1369 Genoa. 12-14	\$12.95

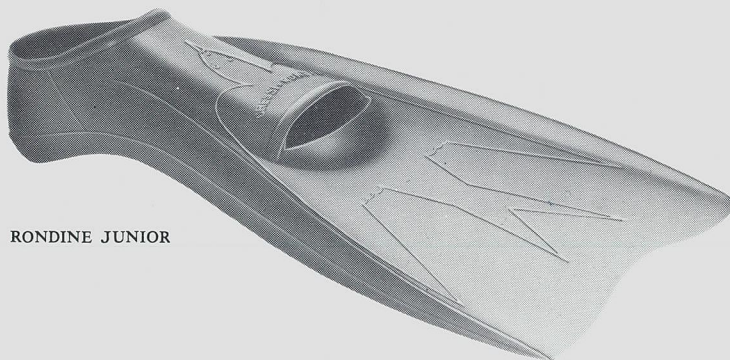

MEDITERRANEAN. BLUE, FLOATING DIVE FINS

1350 Mediterranean 5-7	\$10.95
1351 Mediterranean 7-8½	\$10.95
1352 Mediterranean 8½-10	\$11.95

1354 Mediterranean 12-14	\$12.95

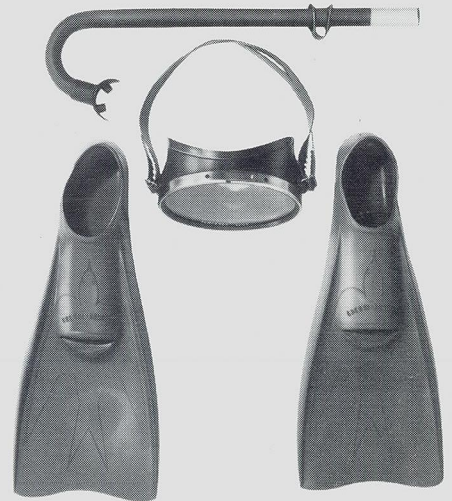

CRESSI RONDINE FINS

CORMORANT AND
CORONADO

RONDINE JUNIOR

THE CORONADO SWIM SET

CRESSI DIVE FINS

Healthways' rubber chemists, through long experience and ingenuity, have mastered the art of compounding rubber to produce America's finest dive fins. Starting with the unmatched Cressi design, they have developed fins that fit right, feel right, and provide the strength and the lively blade action which results in the fin doing most of the work for the diver.

Healthways' Cressi fin line provides a perfect fit in all sizes and for all ages, ranging from the powerful Competition to the tiny Rondine Junior. Each Cressi model offers top quality in its price range.

THE CORMORANT

The Cormorant, made in the black, long wearing, resilient rubber, features a strong, stable blade with powerful action. The foot-pocket is molded in high quality, flexible rubber for comfortable fit.

1340	Cormorant. Black 5-7	\$9.95
1341	Cormorant. Black 7-9	\$9.95
1342	Cormorant. Black 9-11	\$9.95
1343	Cormorant. Black 11-13	\$9.95

THE CORONADO

The Coronado fin line, molded in blue rubber, features a blade with fin tip rigidity for powerful thrust and a flexible, comfortable fitting foot-pocket. Professional in design and performance, the Coronado is an amazing value; it is one of America's most popular fins.

1320	Coronado. Blue 5-7	\$8.95

STABILIZATOR "CLEAR EASE"

HEALTHWAYS DIVE MASKS— THE ULTIMATE IN DESIGN

Healthways is the industry's leader in providing a selection of dive masks that fit and seal on any size or shape of face. From the superb wide vision Pinocchio to the tiny Ostrica, each Healthways mask has won its own following because of its special design characteristics and unquestioned professional quality.

Divers vary widely in mask preference, yet each diver seeks that mask which seals the best and feels the best for him (or her). Whether novice or seasoned pro, you will surely find your own personal favorite in the Healthways line—and the longer you dive with your Healthways mask, the better you will enjoy and respect it.

THE NEW WIDE VISION PINOCCHIO

If there is a "greatest" dive mask on the world market today, it simply has to be the superb new Pinocchio Wide Vision. No other mask so nearly approaches perfection in every detail of design, materials and functional excellence.

The mask skirt, precisely and beautifully molded in every detail, features:

- A double feather edge for *leak-proof seal on any size or shape of face.*
- The resilient, molded rubber nose pocket provides ease in pressure compensating.
- Because of these features, the diver's face blends deeply into the mask, with the eyes close to the face plate for even wider under-

water visibility. The consequent minimum air displacement also permits up to 25% greater skin diving depth.

- A cleverly designed rubber slot is molded into each side of the mask skirt to provide a firm, slip proof housing for the molded, lively rubber head strap.

Beautifully designed plated steel band, slanted safety lens. You have to see the new Pinocchio, feel it on your face and dive with it to appreciate its true greatness.

1243 Pinocchio Wide Vision Black \$11.95

1244 Pinocchio Wide Vision w/"Clear-Ease". Black \$12.95

A Cressi "Clear-Ease" valve is positioned under the nose for quick, positive clearing.

SEAVIEW WIDE VISION

A growing number of divers favor "a wide view" type mask. Healthways Sea View is unique in that it provides panoramic underwater visibility without looking or feeling awkward, heavy or cumbersome on the face. The secret is in the superior design of the mask skirt. Its perfectly compounded rubber, contoured depth and feathered edge cushions the face for a perfect, water-tight seal. These features, coupled with a wide, lively rubber headstrap, provide a feeling of comfortable balance on the face and head while diving—unique in this type of face plate.

Stainless steel band, slanted safety glass lens for greater visibility.

1229 Sea View Wide Vision Black \$6.95

1230 Sea View Wide Vision w/"Clear-Ease. Black \$8.95

Equipped with beautifully molded clearing unit with extra large diaphragm for quick, positive water elimination.

THE STABILIZATOR

Due to the subtleties of design and rubber compounding built into the mask skirt, the Stabilizator is America's most popular "nose pinch" mask. The mask feels stable and comfortably firm on the face when diving. The tapered, feather edge adheres to the facial contours for a positive water-tight seal. The unique finger well merges smoothly into the lip of the skirt to prevent leakage when the nose is pinched for pressure compensation.

"Snap-Lock" stainless steel band, safety glass lens.

1260 Stabilizator. Black \$6.25

1261 Stabilizator. "Clear-Ease" Black \$7.25

Provides easiest clearing through specially molded rubber diaphragm mounted on the mask lens.

1262 Stabilizator "Clear-Ease" \$7.50
Equipped with the Cressi Clear-Ease valve for positive clearing.

SQUALE

PANORAMIQUE

COMPENSATOR

CORONADO

PROFESSIONAL DIVE MASKS

There is a distinct art in blending the rubber compounds that go into a professional quality dive mask. The rubber must have that "just right feel" of lively resilience—the mask skirt must blend comfortably into the contours of many shape faces and provide a finely tapered edge for positive water-tight seal.

The rubber blending must combine the qualities of long wear and resistance to aging, hardening and checking; it must resist the effects of exposure to sun and salt water.

The rubber chemists who blend the rubber for Healthways dive masks have, through many years of experience, found the answer to these subtleties of rubber compounding.

THE SQUALE

The famous Squale with its classic simplicity of design, has for 15 years been one of the world's most popular dive masks. Beautifully molded in the finest, most durable black rubber, this compact, lightweight mask with unique hand feathered edge, *fits and seals comfortably on both large and small faces.*

The short, soft mask skirt brings the eyes close to the face plate to provide wider underwater visibility.

1225 Squale. Black \$4.95

THE COMPENSATOR

The original mask with molded finger well for pressure equalization. The mask skirt is precisely molded in the finest resilient rubber, tapered to a feathered edge to fit the contours of many faces.

The Compensator features a recessed, non-return valve housing, positioned under the nose for quick, easy clearing. The mask can be bought with or without "Clear-Ease."

"Snap-Lock," stainless steel band, safety glass lens.

1223 Compensator. Blue \$5.50

1273 Compensator. Black \$5.75

1227 Compensator w/Clear-Ease. Black \$6.50

The purging unit is installed in No. 1227.

THE PANORAMIQUE

The Panoramique features a slanted, wide angle lens that brings the eyes closer to the face plate for undistorted vision over a wide range. The compact, streamlined design provides stability and balance on the face while diving. The skirt is molded in finest quality rubber with tapered feather edge seal.

The Panoramique features a recessed purge valve housing under the nose for the quick insertion of the clearing device. "Snap-Lock" stainless steel band, safety glass lens.

1222 Panoramique. Blue \$4.50

1272 Panoramique. Black \$4.75

1224 Panoramique w/Clear-Ease. Black \$5.50

The purging unit is installed in No. 1224.

THE CORONADO

The Coronado dive mask is an adult size mask of professional design and quality. The mask skirt, with tapered contouring, is made of a soft, resilient rubber and provides comfortable fit and firm water-tight seal.

"Snap-Lock" stainless steel band, safety glass lens.

1215 Coronado. Blue \$3.95

HEALTHWAYS DIVE MASKS FOR SMALLER FACES

Thousands of modern day youngsters learn to swim and then to dive with mask, fin and snorkel when barely out of diapers. It is sensible that these neophytes be initiated into the sport with the safest, most comfortable equipment. Healthways is uniquely qualified to serve this rapidly growing market.

Each "Junior" size Healthways dive mask is of true professional quality and performance—highest quality soft, durable rubber skirt, safety glass lens, stainless steel bands. Each fits and seals so perfectly that the young diver gains immediate confidence and enjoys the ultimate in pleasure and safety as he learns the skills of the sport.

THE ESPADON JUNIOR

The popular Espadon is a versatile mask; it fits the adult with a small face as well as a wide range of children's faces. The soft, flexible skirt is contoured with a uniquely flared feather edge that cushions and seals perfectly; it provides the stability for deep diving. The Espadon features a "Snap-Lock" stainless steel band, safety glass lens.

1220 Espadon Junior. Blue \$4.50

THE OSTRICAS

The Ostricas are the only high quality dive masks of professional design and quality made to fit small children's faces. They feature soft, tapered skirts with comfortable, cushion-like seal, safety glass lenses and stainless steel bands.

1240 Ostrica Bantam. Blue \$3.95
1239 Ostrica Junior. Blue \$4.25

AQUA CHAMP SWIM MASKS

These well fitting masks are molded in high quality, black rubber with clear styrene lens.

1201 Aqua Champ Junior Black \$1.50
1202 Aqua Champ Senior Blue \$1.75

THE MEDUSA SNORKEL MASK

The Medusa is a full face mask designed by Cressi for shallow water diving. The extra large safety glass lens provides panoramic underwater vision as the viewer cruises on the surface.

Features twin snorkel with double action valves, molded into the soft, comfortably fitting rubber skirt.

1235 Medusa Snorkel Mask Blue \$10.95

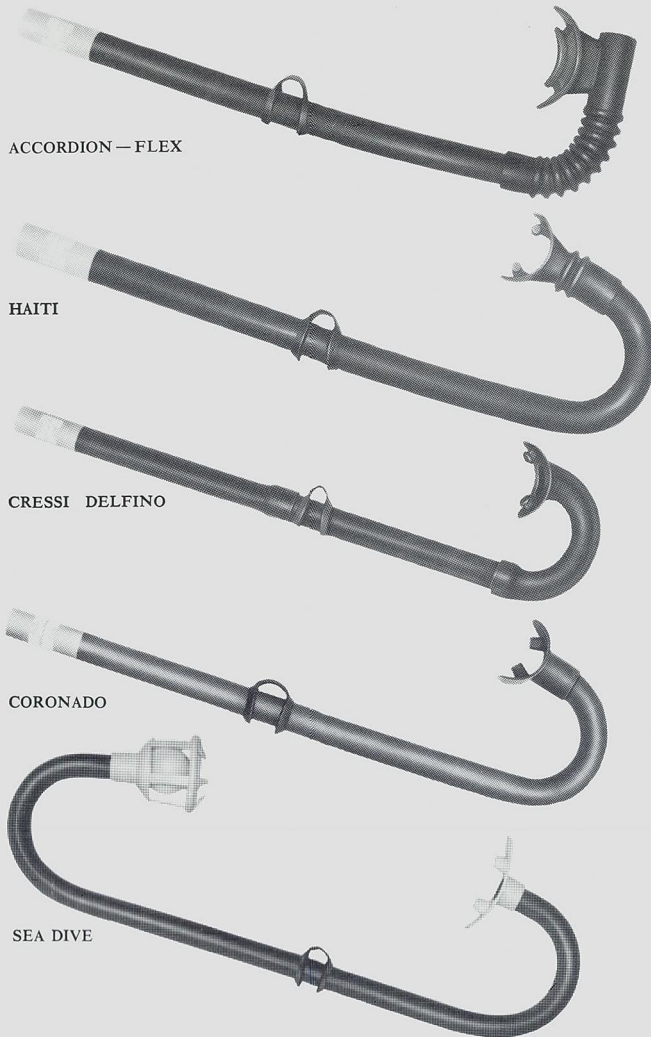

SEA DIVE GOGGLES

The Healthways Sea Dive Goggle is the choice of thousands of American teenagers who train many hours each day in chlorinated pools and then go out and break world records in the swimming events. The Sea Dive is a professional designed goggle with soft skirt, feather edge seal, steel rims and safety glass lens.

1109 Sea Dive Goggles \$4.95

Healthways Aqua Pro has enjoyed many years of popularity with swimmers. It is designed for comfort and safety with clear plastic lens and soft flexible rubber skirt for a comfortable seal.

1107 Aqua Pro Goggles \$2.95

"SNUG FIT FREE FLOW"

SNORKELS

The Snorkel, indispensable to the skin diver, is an important safety device to the Scuba diver who surfaces with an empty cylinder. The snorkel enables him to breathe normally with face submerged during the "long swim back to the boat." By using the snorkel for surface swimming, the Scuba diver increases his diving time by conserving tank air while moving to and returning from the diving area.

Divers have their own personal preferences for the design, size and type of snorkel mouthpiece that "feels best" to them. The same applies to the length, shape and type of snorkel tube. Any diver will find his favorite in the Healthways line.

All Healthways snorkels are equipped with "Safety Glo" tops for water safety.

THE "SNUG-FIT FREE FLOW"

Healthways new "Snug Fit-Free Flow" snorkel incorporates features that are most attractive to the sophisticated diver.

- The one piece, U-shaped, molded rubber elbow with its comfortable mouthpiece provides greater diameters at all points for the free flow of a greater volume of air through the big barrel tube.
- The clear plastic, contoured tube wraps snugly around one side of the diver's head for less drag and greater comfort whether swimming underwater or top side. Slick interior permits a very minimum of water adhesion and restriction.

The Snug-Fit Free Flow is the most advanced snorkel available today.

1440 Snug-Fit Free Flow \$4.50

THE "ACCORDION-FLEX"

This popular snorkel with its short but adequate "accordion-flex" feature combines the advantages of an L-shaped mouthpiece, with less "drag" when the snorkel is not in use. The Accordion-Flex with "Clear-Ease" incorporates a clearing unit installed in a recessed housing at the closed end of the mouthpiece. With this unit, residual water can be purged with each exhalation.

1437 "Accordion-Flex" w/Safety Glo \$2.95

1439 "Accordion-Flex" "Clear-Ease" w/Safety Glo \$3.95

THE HAITI

The Haiti, with its soft, flexible mouthpiece, one piece rubber elbow and tube with "Safety Glo" top, is the favorite of thousands of experienced divers.

1432 Haiti Snorkel. Black \$2.10

THE CRESSI DELFINO

The Cressi Delfino enjoys universal popularity. Features a one piece rubber elbow with soft mouthpiece, a rigid plastic center pipe and upper section of flexible rubber with "Safety Glo" top.

1430 Cressi Delfino. Black \$2.10

THE CORONADO

The new design Coronado, with soft rubber mouthpiece, one piece rubber elbow and tube with "Safety Glo" top, is a professional snorkel in all details at an "economy" price.

1410 Coronado w/Safety Glo Blue \$1.50

THE SEA DIVE

A popular swimmer's snorkel of durable polyethylene, soft vinyl mouthpiece and "check ball" cage.

1405 Sea Dive \$1.50

SPEARFISHING GUNS

SPEARFISHING GUNS

Spearfishing for food and for fun is a natural and basic activity of the skindiver. The sport satisfies a primitive urge to hunt, to stalk, to shoot the game and have it for dinner. The spearfisherman hunts and maneuvers in a foreign environment where only one of his senses is useful—his sight. When he finds a suitable fish, he must stalk him, get within range, shoot fast and accurately; he gets only one shot at a time. A dependable, accurate speargun of appropriate size and power for the type of fish being hunted is obviously a prerequisite for successful, satisfying underwater hunting.

Healthways offers a wide range of high quality spearguns that satisfy the needs of both the fresh-water or salt-water spearfisherman, whether he be novice or highly skilled.

COMPETITION SPEARGUNS

Healthways Competition Spearguns provide the power, accuracy, balance and dependability required by the most fastidious spearfisherman. Basic construction features are: Stainless steel shafts, spearheads, and working parts. Surgical latex rubber slings. One piece, 1 1/4" aluminum tubing for greater strength and stability. New thumb operated safety. Shock cord line, side mounted line release.

Muzzle design holds power slings firmly in place for evenly balanced power and greater accuracy.

The Competition Spearguns are now recognized as the *best balanced* and *most easily maneuvered* because of the position of the contoured center grip handles. "Pistol grip" butt for steady sighting.

THE COMPETITION CUSTOM

The "Custom" is the most versatile rubber powered speargun yet developed. The 36" long, 5/16" diameter stainless steel shaft, notched for 3 power slings, provides the killing power to take "the big ones," yet the gun provides the perfect balance and quick maneuverability required to take small, more elusive fish. Equipped with 2 barb stainless steel spearhead and 2 power slings.

1544 Competition Custom \$34.00

THE COMPETITION COMPACT

The Compact is the ideal speargun for fresh water spearfishing or for salt water hunting around the rocks or other obstructions where perfect balance, maneuverability and adequate power for quick, accurate shots are required.

The 24" long, 5/16" diameter stainless steel shaft has 2 notches. Equipped with 1 barb stainless steel spearhead and 2 power slings.

1543 Competition Compact \$30.00

NEW HEALTHWAYS SPEARGUNS

We are pleased to introduce the new Healthways "Deluxe," "Standard," "Junior," and "Compact" model spearguns. These high quality, economy priced guns feature:

- 5/16" steel shafts
- Sleek, aluminum finish barrels
- Comfortable, expertly designed hand grips
- Muzzles accommodate latex rubber power slings
- Lever-type, thumb operated safeties
- Molded rubber line releases.

This new line of spearguns provides the range of power, accuracy and performance demanded by the most skilled spearfisherman.

THE HEALTHWAYS DELUXE

The "Deluxe," with its 48" long, 5/16" diameter steel shaft, notched for 3 power slings, is the speargun for the hunter who goes for the really "big ones."

Muzzle accommodates one insert for threaded type power sling, #1524-06 plus 2 latex rubber slings. Special handle under barrel for steadier sighting, better balance and maneuverability. 3 power slings, 2 barb-spearhead.

1524 Healthways Deluxe \$30.00

THE HEALTHWAYS "STANDARD"

44", 5/16" diameter steel shaft with 2 notches, 2 barb spearhead, 2 power slings.

1523 Healthways Standard \$24.00

THE HEALTHWAYS "JUNIOR"

40", 5/16" diameter steel shaft with 2 notches, 1 barb spearhead, 1 power sling.

1522 Healthways Junior \$19.95

THE HEALTHWAYS COMPACT

25", 5/16" diameter steel shaft with 2 notches, 1 barb spearhead, 1 power sling.

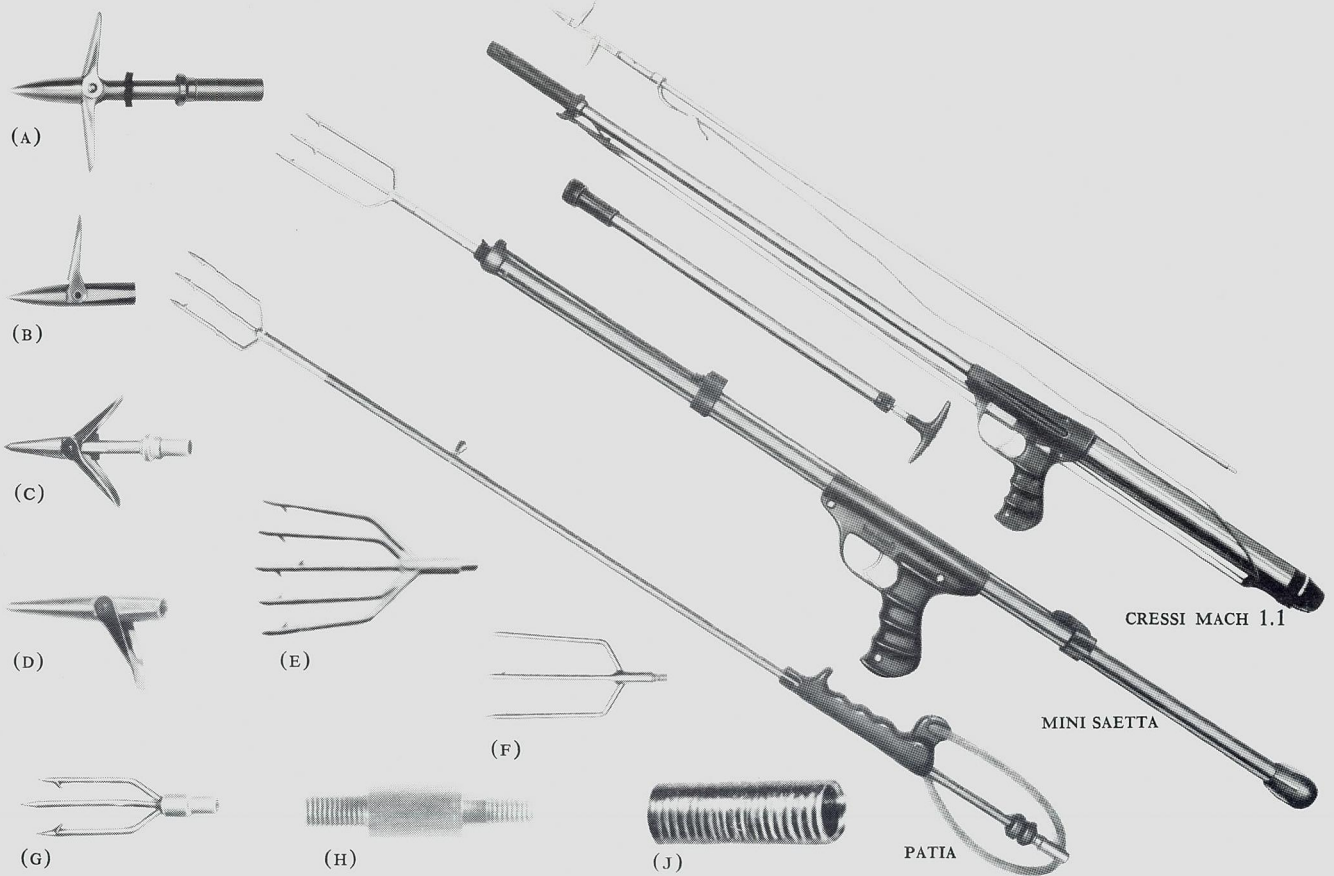

1521 Healthways Compact \$15.95

THE BANTAM SPEARGUN

A lightweight gun, 29", 1/4" shaft with Tri-point head, one threaded type power sling. Thumb operated safety.

1507 Bantam Speargun \$12.50

CRESSI SPEARGUNS

CRESSI SPEARGUNS

Each of the Cressi Spearguns distributed by Healthways is unmatched for distinctive beauty and efficiency in its own type of underwater weapon; each is designed for a different type of underwater hunting.

THE CRESSI MACH 1.1

The Cressi Mach 1.1 is a lightweight, high powered compressed air speargun. A unique shaft propulsion and air cylinder seal design maintains a constant pressure of 250 PSI; it provides the spearfisherman with a normal year's supply of air before recharging. The air cylinder pressure can be increased by simply pumping more pressure into the compressed air cylinder. The spearshaft is inserted in the air tight barrel until the trigger is engaged; the Mach 1.1 is then ready for firing.

The Mach 1.1 also features:

- Positive thumb operated safety.
- Special shock absorbing propulsion mechanism.
- Center grip handle and rear counterweight for perfect balance. Variable power pre-set by the diver before entering the water.

An illustrated booklet of instructions is packed with each gun.

1550 Cressi Mach 1.1
Shaft 37" **\$70.00**

THE MINI SAETTA

The Mini Saetta is a beautifully designed, spring powered gun with the accuracy and power for a wide range of spearfishing activity. The contoured center grip provides fine balance for exceptional accuracy and maneuverability. This handsome gun is gaining steadily in popularity in the American market.

1532 Mini Saetta, Shaft 27" \$22.00

THE PATIA HAND GUN

The unique Patia features a contoured handle grip with a molded slot which is attached to a surgical rubber sling. The gun is cocked by extending the handle and stretching the sling until the slot is inserted into a latch on the spear shaft. A turn of the wrist releases the spear. This compact hand gun is ideal for close up shooting in rocky or murky waters.

1502 Patia Hand Spear \$8.95

SCUBALITE

SKI DOOTER

BOUEE FENZY LIFE JACKET

Healthways is exclusive distributor for U.S. and Canada for the Bouée "Fenzy," the regulation life jacket of the French Navy. Made of a rubberized material in the shape of a collar, the jacket provides a volume of 52 cu. ft. of air. The unit is instantly inflatable under water by opening a 14 cu. ft. bottle of air compressed at 440 PSI (approx. 28 cu. ft. at 300 ft. depth).

In case of difficulty, the diver can be parachuted swiftly to the surface with no effort on his part. The head is held above the surface, even in rough water, while at rest. Other features:

Inflatable by mouth, or, total or partial deflation, at the surface.

Simple alteration of the pressure during a dive in case of over compression at depth.

Controlled deflation during rise to the surface by means of gradual decompression.

Diver can maintain himself at a determined depth without continued alteration of lead weights.

Will raise heavy objects from the seabed such as tools and equipment.

Possibility of breathing from the jacket itself during ascent in case of damaged diving gear.

The operation of the unit is independent from the diving apparatus.

The air bottle is simple to refill; a loading valve allows speedy, on the spot refilling from any diving cylinder.

(Additional specifications are available on request.)

No. 1994 Bouee Fenzy Life Jacket \$220.00

INFLATABLE DIVERS FLAG

1969 Inflatable Divers Flag \$1.95

BIG JIM DIVERS FLAG/BUOY

1970 Big Jim Divers Flag with Buoy \$3.50

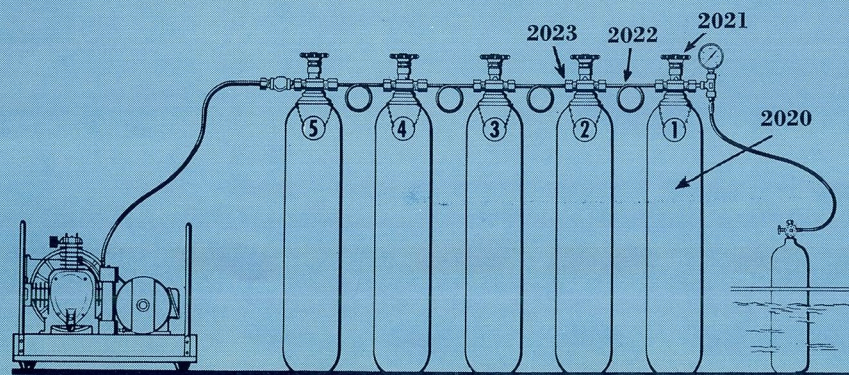

SCUBALITE

The Scubalite with 80,000 candlepower is the most powerful diving light ever developed for SCUBA divers. (Uses 6 standard "D" batteries, not included.)

1991 Scubalite \$15.95

SKI DOOTER

The Ski dooter is constructed of special marine plywood and attractively finished in colors with white racing stripes. This skimmer board provides a smooth ride on the receding waves of the ocean or lake as they race across the sand. The same balance and skills are required as for riding a surfboard. **2102 2' x 3' x 1/2' \$7.95**

AIR STATION

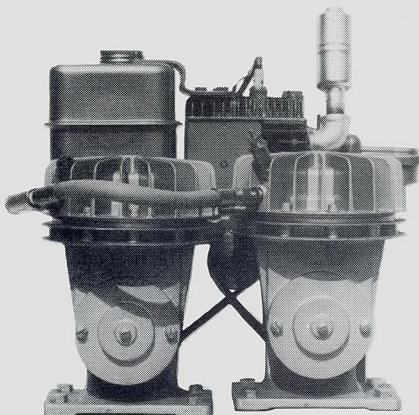

Healthways storage tanks and accessories provide a compressed air station service for divers in any area. A cascade of 5 or more tanks is recommended and/or a high pressure compressor, as illustrated.

- 2020 Storage Tank w/Valve 360 cu. ft. \$125.00**
- 2021 Shut-off Valve for Storage Tank \$9.95**
- 2022 Oxygen Pigtail with Handle Wrench \$11.50**
- 2023 Oxygen Tee \$11.50**

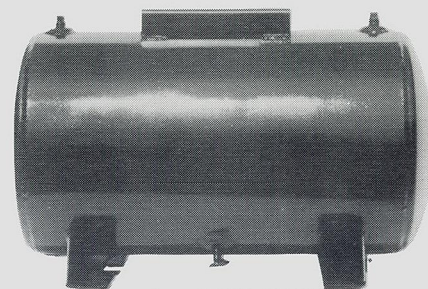

HOOKAH DIVING EQUIPMENT

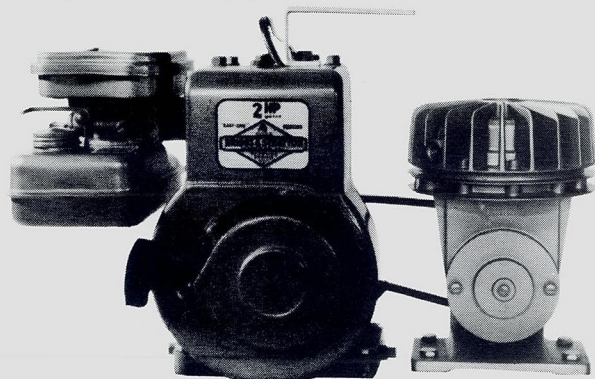

BARE HOOKAH COMPRESSOR

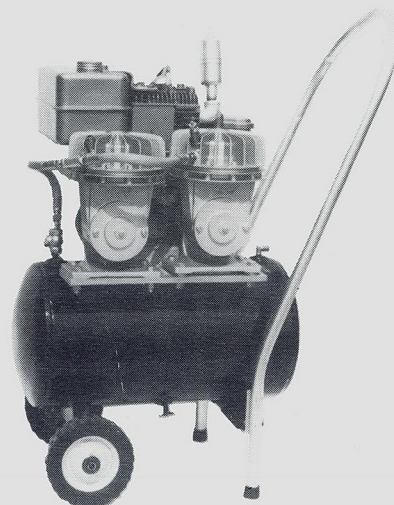

TWIN GAS COMPRESSOR

AIR RESERVE TANK

SINGLE GAS COMPRESSOR

TWIN GAS COMPRESSOR W/AIR RESERVE TANK AND WHEEL CART

A Hookah unit provides a portable underwater air supply; it combines a demand regulator connected to a low pressure Hookah Compressor by a medium pressure hose. Designed for working at a limited depth and area for extended periods of time, the unit is ideal for gold diving, underwater mining, repair, salvage, and exploration. All Hookah Compressors listed provide oil free air needing no filtration.

BARE HOOKAH COMPRESSOR

Capacity 3.5 CFM. Pressure 100 PSI. Weight 10 lbs.

This light weight compressor with sealed bearings needs no lubrication or filtration.

2000 Bare Hookah Compressor \$65.00

SINGLE GAS DRIVEN COMPRESSOR

Capacity 3.5 CFM. Pressure 100 PSI. Weight 37 lbs.

Light weight, portable compressor powered by a 2 H.P. Briggs and Stratton aluminum gas engine. Provides an air supply for one diver to 60 feet or two divers to 30 feet.

2001 Single Gas Driven Compressor \$185.00

TWIN GAS DRIVEN COMPRESSOR

Capacity 7 CFM. Pressure 100 PSI. Weight 48 lbs.

Heavy duty compressor driven by 3 H.P. Briggs and Stratton aluminum gas engine. New compact design displaces less area, reduces vibration — adding to life of compressor and engine. Commonly used by

commercial divers for salvage, maintenance, research and abalone diving. Provides an air supply for one diver to 125 feet and two at 60 feet.

2002 Twin Gas Driven Compressor \$285.00

TWIN GAS DRIVEN COMPRESSOR w/AIR RESERVE TANK

Capacity 7 CFM. Pressure 100 PSI. Weight 73 lbs. 3 H.P. Briggs and Stratton aluminum gas driven engine. Compact design. Ideal combination for commercial applications — the necessary valves, fittings, hoses and specially designed air reserve safety tank with moisture drain. Compressor wheel cart not included.

2003 Twin Gas Driven Compressor w/Air Reserve Tank \$350.00

AIR RESERVE TANK ONLY

Tank is especially built for this application, having no fittings or valves. Weight 24 lbs.

2004 Air Reserve Tank \$45.00

HOSE AND HARDWARE KIT

Contains flexible hose connectors, inlet check valve, drain plug, pressure relief valve (adjustable), and all fittings to adapt the compressor to the air Reserve Tank. Weight 2 lbs.

2004-01 Hose and Hardware Kit \$25.00

COMPRESSOR WHEEL CART

Complete with heavy duty wheels, handle and necessary hardware. Weight 5 lbs.

2005 Compressor Wheel Cart \$30.00

HOOKAH HARNESS—SINGLE HOSE REGULATORS

Designed to fit all Healthways single hose regulators with easily adjustable nylon webbing straps. Complete with check valve and adaptable fittings.

2006 Hookah Harness for Single Hose Regulators \$25.00

HOOKAH DIVING HOSE, YELLOW

Made of a special compound that will not contaminate air and when pressurized has neutral buoyancy. 50 foot length, coupled.

2007 Hookah Diving Hose 50 ft. \$27.50

2007-01 Regulator to Air Hose Connector \$1.10

2007-02 Air Hose Connector To couple air hose sections together \$1.10

2008 Air Pressure Gauge \$7.50

FIELD SERVICE KIT FOR COMPRESSOR

Enables user to make a minor overhaul of compressor unit requiring no special tools. Included are: Gaskets, screen filter, valve plate assembly, inlet valve and air seal.

2009 Service Kit \$18.00
